Preface	Preface-1
1. Analog Interfaces	1-1
1.1 Interoffice Trunk Interfaces	1-1
1.2 Operator System Trunk Interfaces	1-2
1.2.1 Interface for Trunks to Telephone Company Operator Services System	1-4
1.2.2 Interface for Direct Trunks to IC Operator Systems	1-4
1.2.3 Interface for Trunks to Switchboards	1-5
1.2.4 Interface for Busy Line Verification	1-5
1.3 Interfaces to DA Systems	1-6
1.3.1 Introduction	1-6
1.3.2 Interfaces to DA Systems	1-6
1.4 Interfaces to Intercept Systems	1-6
1.4.1 Interfaces to Intercept Systems	1-7
1.4.2 Interfaces to Directory Assistance Systems and Trunk Concentrators	1-7
1.4.3 No. 6A Announcement System	1-8
1.4.4 Local Announcement Systems	1-8
1.4.5 Switchboards	1-8
1.5 Interfaces With Announcement Systems	1-9
2. Digital Interfaces	2-1
2.1 DS1 Level	2-1
2.1.1 Electrical Characteristics	2-1
2.1.2 Format Characteristics	2-1
2.1.3 DS1 Interfaces	2-7
2.2 DS1C Level (Mode 2 Compatibility)	2-10
2.2.1 Electrical Characteristics	2-11
2.2.2 Format Characteristics	2-11
2.2.3 DS1C Interfaces	2-12
3. Support System Interface Protocol	3-1
3.1 Overall Architecture	3-1
3.2 Physical Interfaces	3-1
3.3 Link Layer	3-2
3.4 Packet Layer	3-2
3.5 Session Layer	3-3
3.6 Transaction-Oriented Protocol	3-4
3.7 File Transfer Protocol	3-4
3.8 Other Higher-Level Alternatives	3-5
4. Central Office Cross-Connection Systems (DFs and DSXs)	4-1
4.1 Distributing Frames	4-1
4.2 Digital System Cross-Connects	4-1

4.3 Analog Switch Interface with Distributing Frames 4-1
4.4 Digital Switch Interface with Distributing Frames/DSXs 4-2
