
TMN F Interface Functional Requirements

Contents

[Telcordia SR-4069-Documentation Information](#)

1. Introduction On The TMN F Interface	1-1
1.1 Why Is The F Interface Needed?.....	1-1
1.2 Document Organization	1-2
1.3 The F Interface Within The TMN Architecture	1-4
1.3.1 F Interface Within the TMN Functional Architecture	1-4
Figure 1-1.	1-7
1.3.2 F Interface Within the TMN Physical Architecture	1-7
1.3.3 F Interface Within the TMN Information Architecture	1-9
1.4 F Interface/f Reference Point Versus The g Reference Point	1-11
2. TMN User's Requirements Impacting the F Interface.....	2-1
2.1 General Requirements	2-1
2.2 Task-Related User Requirements	2-3
2.3 Management Services F Interface Requirements	2-4
3. Initialization Of An F Interface Association Requirements.....	3-1
4. Communications Styles Between TMN Building Blocks.....	4-1
4.1 Propagation of Management Mechanisms	4-1
4.2 Communications Between WS and OS.....	4-1
4.3 For System Management of the WS	4-2
4.4 For System Management of the OS	4-2
4.5 Communications Between WS and NE	4-2
5. Resource Representation Management Requirements.....	5-1
5.1 Resource Representations	5-1
5.2 Naming	5-3
5.3 Retrieval Services.....	5-4
5.4 Modification Services	5-4
5.5 Notification Services	5-5
5.6 Create Services	5-5
5.7 Destruction Services.....	5-6
5.8 Representations of Support Entities in the WS	5-8
5.9 What's Not In The F Interface	5-9
6. Shared Management Knowledge Requirements	6-1
6.1 Roles.....	6-1
6.2 Establishment of Shared Management Knowledge	6-1
6.3 Management Information Conversion Over F Interface	6-2
6.4 What's Not Part of the F Interface	6-3

7. Event Registration/Notification Requirements	7-1
7.1 Receiving Event Notifications	7-1
7.2 Controlling Event Notification.....	7-1
7.3 Examples	7-2
7.4 Generic Management Services.....	7-2
7.5 What's Not Part of the F Interface	7-3
8. Logs and Log Management Requirements	8-1
9. Location Transparencies Requirements	9-1
9.1 Requirements From TMN	9-1
9.2 TMN Functional Components.....	9-2
9.3 Naming/Addressing Support	9-3
9.4 Shared Management Knowledge	9-3
9.5 Security Support.....	9-4
9.6 Administrative Usage.....	9-5
9.7 Other Distribution Transparency Services	9-5
10. Transaction Management Requirements and Concurrency Control Requirements	10-1
10.1 Transaction Management	10-1
10.2 Concurrency Control	10-2
10.3 Resource Allocation and Deadlock Requirements.....	10-2
11. Data Consistency Requirements	11-1
12. Performance, Reliability, Availability, etc. Requirements	12-1
12.1 Message Transfer	12-1
12.2 Reliability, Availability, Survivability	12-1
12.3 Software Management.....	12-1
12.4 Real-time Message Management	12-2
12.5 Cost.....	12-2
13. Security Requirements	13-1
13.1 Security Threats.....	13-1
13.2 Security Requirements Impacting The F Interface	13-1
13.2.1 User Identification Requirements Impacting F Interface.....	13-2
13.2.2 Authentication Requirements Impacting F Interface	13-2
13.2.3 Access Control Requirements Impacting F Interface	13-2
13.2.4 Data Integrity Requirements Impacting F Interface.....	13-3
13.2.5 Privacy Requirements Impacting F Interface.....	13-3
13.2.6 Audit Requirements Impacting F Interface.....	13-3
14. Requirements Which Will Impact Information Models	14-1
15. F Interface Requirements and Software/Hardware Implementation.....	15-1
16. TMN Interface Conformance and the F Interface.....	16-1
References	References-1

List of Figures

Figure 1-1.	F Interface Within The TMN Functional Architecture.....	1-7
Figure 1-2.	F Interface Within the TMN Physical Architecture	1-9
Figure 1-3.	F Interface Within The TMN Information Architecture.....	1-10
Figure 5-1.	Relationship Between User Interface Objects, WS Resource Representations, and Managed Resource Representations.....	5-3
Figure 5-2.	Closing a UI View	5-8
Figure 6-1.	Managed Resource Representations Mapped to Multiple WSs	6-3
Figure 9-1.	Location Transparency Services and the F Interface.....	9-3
