Telcordia SR-5222-Documentation Information

1 Introduction

1.1 Scope	1-1
1.2 About the FCC ARMIS	1-3
1.3 Summary of Findings	1-4
1.4 Document Organization	1-7

2 Access Lines and Local Switching System Types

2.1 Total Working Lines and Switched Access Lines	2-1
Analog Working Line Observations	2-3
Switched Access Line Observations	2-5
2.2 Residential and Business Switched Access Lines	2-6
Residential/Business Line Observations	2-7
Business Line/Trunk Observations	2-9
2.3 Payphone Switched Access Lines	2-10
Payphone Line Observations	2-12
2.4 ISDN Deployments	2-13
2.4.1 ISDN BRI Deployments	2-13
ISDN BRI Observations	2-20
2.4.2 ISDN PRI Deployments	2-21
ISDN PRI Observations	2-22
2.5 Local Switching Systems	2-23
Local Switching System Observations	2-27

3 Digital Loop Carrier Served Lines

3.1 Working Channel Growth	3-2
Working Channel Observations	3-4
3.2 DLC Growth	3-5
DLC Working Channel Observations	3-9
3.3 DLC Equipped Channels and Spares	3-11
3.3.1 Equipped and Working Channels	3-11
Working and Equipped Channel Observations	3-14
3.3.2 Spare Equipped Channels	3-14
Spare Equipped Channel Observations	3-18
3.4 DLC Deployment By State	3-19
DLC State Deployment Observations	3-21

4 FCC ARMIS Terminology

5 ILEC Locations By State

Appendix A: References
