

CONTENTS

1. EXECUTIVE SUMMARY . . . . .	1-1
1.1 Motivation for SONET . . . . .	1-1
1.2 SONET Feature Description . . . . .	1-1
1.3 Planning for SONET . . . . .	1-2
1.4 SONET Architectures . . . . .	1-3
1.5 Management System Support for SONET Architectures . . . . .	1-4
1.6 Additional SONET Features and Applications . . . . .	1-4
2. PURPOSE AND SCOPE . . . . .	2-1
3. MOTIVATION FOR SONET . . . . .	3-1
3.1 Standardized Optical Transmission . . . . .	3-1
3.2 Single-Ended Operations . . . . .	3-1
3.3 Network Management . . . . .	3-1
3.4 Cost Reduction . . . . .	3-2
3.5 Software Management . . . . .	3-2
3.6 Survivability and Availability . . . . .	3-2
3.7 Rapid Provisioning and Remote Network Configuration . . . . .	3-3
3.8 Bandwidth Management . . . . .	3-3
3.9 Customer Network Management . . . . .	3-3
3.10 High-speed Transport Services . . . . .	3-4
4. SONET PRODUCT AND FEATURE DESCRIPTION . . . . .	4-1
4.1 SONET Standards Structure and Status . . . . .	4-1
4.2 SONET Feature Description . . . . .	4-2
5. INTEGRATED NETWORK AND OPERATIONS ARCHITECTURE . . . . .	5-1
5.1 Network Architecture . . . . .	5-1
5.2 Synchronization . . . . .	5-2
5.3 Operations Functionality and Communications Infrastructure . . . . .	5-2
6. SONET NETWORK ARCHITECTURE . . . . .	6-1
6.1 General Architectures and SONET Impacts . . . . .	6-1
6.2 Interworking Between Architectures . . . . .	6-16
6.3 Interworking SONET with Future Technologies and Architectures . . . . .	6-19
6.4 Network Element and Architecture Transition . . . . .	6-26
7. SONET SYNCHRONIZATION . . . . .	7-1
7.1 Short-term Stability . . . . .	7-1
7.2 Synchronization Status Messages . . . . .	7-1
8. ENTERPRISE MODEL AND ANALYSIS OF SONET OPERATIONS . . . . .	8-1
8.1 Background . . . . .	8-1
8.2 Motivation and Goals . . . . .	8-1
8.3 Description of Functional Flows . . . . .	8-2
8.4 Network Capacity Provisioning . . . . .	8-2
8.5 Service Activation . . . . .	8-3
8.6 Service Assurance . . . . .	8-5
8.7 Feature Set Description . . . . .	8-6
9. SONET OPERATIONS COMMUNICATIONS NETWORK . . . . .	9-1
9.1 Using SONET DCCs . . . . .	9-1
9.2 Using LANs . . . . .	9-3
9.3 OSI Management Messages . . . . .	9-5
9.4 OS/NE Interfaces . . . . .	9-6
9.5 Additional Operations Communications Issues . . . . .	9-11

10. DISTRIBUTED MANAGEMENT FOR SONET (SUB-NETWORK OPERATIONS CONTROLLERS)	10-1
10.1 Motivation and Framework	10-1
10.2 SOC Functional Opportunities	10-3
11. OPERATIONS NEEDS OF SONET ARCHITECTURES	11-1
11.1 Common Operations Needs	11-1
11.2 Point-to-Point, Linear and Tree	11-7
11.3 USHR/P	11-9
11.4 2-Fiber BLSR	11-10
11.5 4-Fiber BLSR	11-11
11.6 Mesh	11-12
11.7 Interconnecting Rings	11-13
12. CROSS PRODUCT OPERATIONS SUPPORT OF SELECTED APPLICATIONS	12-1
12.1 SONET-in-the-Loop	12-1
12.2 Bandwidth Management Services	12-2
13. OPERATIONS SYSTEM SUPPORT FOR SONET	13-1
14. LIST OF ACRONYMS	14-1
15. REFERENCES	15-1
A. BELLCORE OPERATIONS SYSTEMS SUPPORT PLANS FOR SONET	A-1
A.1 Network Capacity Provisioning	A-1
A.2 Service Activation	A-2
A.3 Service Assurance	A-3

LIST OF FIGURES

Figure 4.2.1. Overhead Byte Locations in an STS-1 Frame . . . . .	4-3
