

Contents

1. Introduction	1-1
2. Introduction to Inband Tone Signaling	2-1
3. New Services with Challenging Signaling Environments	3-1
3.1 Calling Identity Deliver on Call Waiting	3-1
3.2 Why is this Signaling Application Different?	3-2
3.2.1 Variables In the Signaling Environment	3-2
4. Signaling and Detection Methodology	4-1
4.1 Selection of an Alerting Signal	4-1
4.2 Functional Description of the Detection Method	4-2
4.3 Timing Algorithms	4-3
4.3.1 C3 Timing Algorithm	4-3
4.3.2 Speaker Level-Loop Loss (SLL) Adaptive Timing Algorithm	4-4
5. Timing Algorithm Flowcharts	5-1
6. SLL Flowchart Program Terminology	6-1
7. SLL Flowchart Parameter and Variable Definitions	7-1
