

Table of Contents

1. Introduction
 2. Single Polarization Requirement
 3. Preliminary Requirements for Cochannel Dual-Pol Digital Radio System
 - 3.1 Cross-Pol Interference Canceler
 - 3.2 Channel Combining and Dropping Networks
 - 3.3 Co-Polar Adjacent Channel Interference
 - 3.4 False Locking Problem
 - 3.5 Frequency Diversity Protection
- Appendix A Preliminary Characteristics of In-Line Signal and Cross-Pol Interference
- A.1 Single Tone Statistical Model
 - A.2 Dispersive Wide Band Cross-Pol Interference During Nonfaded period
 - A.3 Dispersion of Cross-Pol Interference During Multipath Fading
 - A.4 Cumulative Distribution of In-Band Power Difference
