

Digital Fiber Optic Systems
Requirements and Objectives
Issue 3

CONTENTS

1.0	INTRODUCTION	1
1.1	Scope and Objectives	1
1.2	Highlights of the Update	1
1.3	Criteria	2
1.4	How to Use This Document	2
2.0	Fiber Optic Terminal Equipment	3
2.1	Interfaces	3
2.1.1	Cross-connect Interfaces	3
2.1.2	Alarm Indication Signal	3
2.1.3	Electrical Cable Distance	3
2.1.4	Optical Signal Interface	4
2.1.5	Cable Interconnection Interface	4
2.1.6	Operations Systems Interface	4
2.2	System Performance Criteria	4
2.2.1	Availability and Reliability	4
2.2.1.1	Availability Requirement	4
2.2.1.2	Equipment Reliability Estimates	5
2.2.1.3	Supplier-Provided Outage Calculations	6
2.2.1.4	Minimum Reliability of Transmitters and Receivers	6
2.2.2	Error Performance	6
2.2.2.1	Error Performance Parameters	6
2.2.2.2	Error Performance Requirements	7
2.2.2.3	End-to-End Error Performance	7
2.2.3	Protection Switching Performance	7
2.2.3.1	Detection Times	7
2.2.3.2	Switch Completion Time	8
2.2.3.3	Switching Thresholds	8
2.2.3.4	Protection Switching Reliability	8
2.2.3.5	Silent Failure Requirements and Objectives	9
2.2.3.6	Supplier Provided Information	9
2.2.3.7	Silent Failure Outage Calculations	10
2.2.3.8	Protection Switching over a Terminal's Circuit Packs	10
2.2.4	System Transient Response	10
2.2.4.1	System Start-Up	11
2.2.4.2	Input Phase Hit	11
2.2.4.3	Temporary Signal Interruption	11
2.2.5	Jitter	11
2.2.5.1	Jitter Accommodation	11
2.2.5.2	Jitter Generation	11
2.2.5.3	Basic Jitter Generation Requirements	12
2.2.5.4	Jitter Transfer Functions of Regenerators and Terminals	12
2.2.5.5	Jitter Enhancement	12
2.2.5.6	Jitter Performance of Equipment Providing Non-Standard Interface	12
2.2.6	Transmission Delay	13
2.3	Transmission Design Information	13
2.3.1	Single-mode Transmission Design Information	13

PRELIMINARY

2.3.1.1	General System Information	13
2.3.1.2	Transmitter Information	13
2.3.1.3	Receiver Information	14
2.3.1.4	Attenuators	15
2.3.1.5	WDM Device	15
2.3.1.6	Safety Margin	16
2.3.1.7	Connectors	16
2.3.1.8	Jumper Cable	16
2.3.2	Multimode Transmission Design Information	16
2.3.2.1	General System Information	17
2.3.2.2	Transmitter Information	17
2.3.2.3	Receiver Information	17
2.3.2.4	Attenuators	18
2.3.2.5	WDM Device	18
2.3.2.6	Safety Margin	19
2.3.2.7	Connectors	19
2.3.2.8	Jumper Cable	19
2.4	Operations and Maintenance	19
2.4.1	Interfaces with BOC Operations Systems	19
2.4.2	Line Performance Monitoring and Fault Locating	20
2.4.2.1	Line Performance Monitoring (Switch Section)	20
2.4.2.2	Line Fault Locating (Regenerator Span)	20
2.4.3	Telemetry and Order Wire	20
2.4.4	Protection Switching	21
2.4.5	Restoration	21
2.4.6	Jack Access	21
2.5	Physical and Environmental Requirements	21
2.5.1	Central Office and Regenerator Station Equipment	21
2.5.2	Equipment Design	21
2.6	Documentation and Training	22
2.6.1	Required Documentation: General	22
2.6.2	Engineering Documentation	23
2.6.3	Space Planning Information	24
2.6.4	Training	24
2.6.5	Documentation Standards	24
2.7	Power	24
2.7.1	Voltage Requirements	24
2.7.2	Noise Requirements	25
2.8	Safety	26
2.9	Quality and Reliability	26
2.9.1	General Quality and Reliability Requirements	26
2.9.1.1	System Reliability	26
2.9.1.2	Physical Design	26
2.9.1.3	Software Quality Program	26
2.9.1.4	Manufacturing Quality Program	27
2.9.1.5	Product Support Systems	27
2.9.2	Supplier Provided Quality and Reliability Information	27
2.9.3	Quality Program Analysis	27
2.10	Other Requirements and Objectives	27
3.0	Outside Plant Cable	29
3.1	Transmission Design Information	29
3.1.1	Single-Mode Cable Transmission Design Information	29
3.1.1.1	Basic Cable Transmission Parameters	29
3.1.1.2	Parameters for Particular Applications	29

3.1.1.3	Global Fiber Parameters	30
3.1.2	Multimode Cable Transmission Design Information	31
3.1.2.1	Parameters for Particular Applications	31
3.1.2.2	Global Fiber Parameters	31
3.2	Operations and Maintenance	32
3.2.1	Outside Plant Maintenance	32
3.2.2	Restoration	32
3.3	Physical and Environmental Requirements	32
3.4	Documentation and Training	33
3.4.1	Required Documentation: General	33
3.4.2	Engineering Documentation	34
3.4.3	Training	34
3.4.4	Documentation Standards	34
3.5	Safety	34
3.6	Quality and Reliability	35
3.6.1	General Quality and Reliability Requirements	35
3.6.2	Supplier-Provided Quality and Reliability Information	35
3.6.3	Quality Program Analysis	35
3.6.4	Manufacturing Quality Surveillance and Inspection	36
4.0	Overall System Requirements and Objectives	38
4.1	System Performance Criteria	38
4.1.1	Availability	38
4.1.2	Protection Switching Performance	38
4.1.3	Other Performance Criteria	38
4.2	Fiber Optic System Transmission Design	38
4.2.1	Single-mode System Transmission Design	39
4.2.1.1	Regenerator Section Bit Error Ratio	39
4.2.1.2	Cutoff Wavelength	39
4.2.1.3	System Gain and Cable Loss	39
4.2.1.4	Pulse Broadening	40
4.2.1.5	Design and Analysis Computational Algorithms	41
4.2.2	Multimode System Transmission Design	42
4.2.2.1	Regenerator Section Bit Error Ratio	42
4.2.2.2	System Gain and Cable Loss	42
4.2.2.3	Bandwidth	43
4.2.2.4	Design and Analysis Computational Algorithms	44
5.0	REFERENCES	46
5.1	Bellcore Publications	46
5.2	U. S. Government Publications	47
