

Generic Requirements for Wire Connectors

CONTENTS

1. Introduction	1
1.1 Purpose and Scope of Document.....	1
1.2 Summary of Changes.....	1
1.3 Organization	1
1.4 Requirements Terminology	1
2. General Information.....	2
2.1 Product Description	2
2.2 Operating Environment	2
3. Requirements.....	3
3.1 Mechanical.....	3
3.1.1 Materials and Finishes.....	3
3.1.2 Tensile Strength.....	3
3.1.3 Torsion.....	3
3.1.4 Bending	3
3.2 Electrical	3
3.2.1 Insulation Resistance (All Dry Connectors).....	3
3.2.2 Insulation Resistance (Multiple Pair Connectors).....	3
3.2.3 Insulation Resistance (High Humidity)	3
3.2.4 Insulation Resistance (Immersion).....	4
3.2.5 Dielectric Strength	4
3.2.6 High Voltage Surge	4
3.3 Environmental.....	4
3.3.1 Temperature Cycling.....	4
3.3.2 Temperature Cycling with Humidity	4
3.3.3 Stress Relaxation	5
3.3.4 Salt Fog Exposure	5
3.3.5 Fungus Resistance	5
3.3.6 Chemical Resistance.....	5
3.3.7 Flame Retardancy.....	6
3.4 Quality Assurance.....	6
3.4.1 Quality Program Analysis.....	6
3.4.2 Product Quality Surveillance	6
4. Test Procedures.....	8
4.1 Tensile Strength	8
4.2 Torsion	8
4.3 Bending.....	8
4.4 Insulation Resistance (All Dry Connectors)	8
4.5 Insulation Resistance (Multiple Pair Connectors).....	8
4.6 Insulation Resistance (High Humidity).....	9

4.7	Insulation Resistance (Immersion)	9
4.8	Dielectric Strength	10
4.9	High Voltage Surge	10
4.10	Temperature Cycling	10
4.11	Temperature Cycling with Humidity	11
4.12	Stress Relaxation	11
4.13	Salt Fog Exposure	11
4.14	Chemical Resistance.....	11
5.	Glossary.....	12
6.	References.....	13
