
OSSGR Section 21: Operator Subsystem

Contents

Preface	Preface-1
1. General	1-1
1.1 Document Organization	1-2
1.2 Overview of IWSS Environment	1-3
1.2.1 IWSS Functional Model.....	1-3
1.2.2 Standalone Workstations.....	1-6
1.2.3 Workstation System Communication	1-6
1.3 Reasons for Reissue	1-7
1.4 Generic Requirements Terminology	1-7
1.4.1 Requirement Labeling Conventions.....	1-8
1.4.1.1 Numbering of Requirement and Related Objects.....	1-8
1.4.1.2 Requirement, Conditional Requirement, and Objective Object Identification.....	1-8
1.4.2 Supporting Text for Generic Requirements	1-9
1.4.3 Definitions.....	1-9
1.4.4 Requirements List	1-9
2. Common Functionality	2-1
2.1 Operator Console	2-1
2.1.1 Video Display	2-1
2.1.2 Keyboard.....	2-15
2.1.3 Workstation Configuration	2-20
2.1.4 Training Mode.....	2-23
2.2 Subsystem Design	2-24
2.2.1 Performance	2-25
2.2.2 Core System - Subsystem Interface for Non-IWSS Environments	2-25
2.2.3 Operator Console Acoustic Interface	2-25
3. Supervisory and Administrative Functionality Specific to Non-IWSS Environments	3-1
3.1 Supervisory Functions.....	3-1
3.1.1 Service Assistant Capabilities	3-1
3.1.2 Monitoring	3-2
3.1.3 Administrative Functions	3-3
4. Operator Subsystem Generic Requirements Specific to IWSS Environments	4-1
4.1 General IWSS Features	4-1
4.1.1 System Evolution and Modularity	4-1

4.1.2	Universal Position	4-3
4.1.3	Programmability.....	4-3
4.1.4	Service Enhancement/Creation/Trialing	4-6
4.2	Generic Requirements for IWSS Functional Modules.....	4-8
4.2.1	Workstation Layer Service Logic	4-8
4.2.2	Local Communication Capability	4-12
4.2.3	User Interface Management System	4-14
4.2.4	Human/Machine Interface Equipment	4-19
4.2.5	Communication Server	4-22
4.2.6	IWSS Databases	4-24
4.2.7	Data Collection and Reporting.....	4-31
4.2.8	Standalone Workstations.....	4-37
4.3	IWSS/OSS Switch Interface	4-41
4.4	IWSS Operations, Administration, and Maintenance	4-43
4.4.1	Supplier Support	4-43
4.4.2	Attendant Training	4-45
4.4.3	Measurements	4-46
4.4.4	System Maintenance	4-50
4.4.5	Database Management	4-52
4.4.6	System Management.....	4-53
4.4.7	System Capacity.....	4-53
4.5	IWSS Security.....	4-54
4.5.1	Identification and Authentication.....	4-55
4.5.2	Access Control	4-57
4.5.3	Auditing	4-61
4.5.4	Integrity.....	4-61
4.5.5	Confidentiality	4-61
4.5.6	Security Management	4-62
4.6	IWSS Reliability and Quality.....	4-66
4.6.1	Availability.....	4-66
4.6.2	Architecture.....	4-68
4.7	IWSS Attendant Capabilities	4-69
4.7.1	Attendant Logon	4-70
4.7.2	Attendant Logout	4-71
4.7.3	Call Monitoring.....	4-72
5.	OSS Switch Support of the IWSS.....	5-1
5.1	OSS Switch Support of the IWSS/OSS Switch Interface	5-1
5.2	Unbundling of OSS Switch Capabilities.....	5-2
5.3	OSS Switch Support of IWSS Interactions with Network Databases and Systems	5-2
5.4	OSS Switch Support for Standalone Workstations.....	5-3
5.5	OSS Switch Support of Call Transfer	5-3
5.6	Impacts of IWSS AMA Philosophy on the OSS Switch.....	5-4

References	References-1
Glossary	Glossary-1
Requirement-Object List	ROL-1

List of Figures

Figure 1-1.	IWSS Functional Architecture.....	1-4
Figure 2-1.	Example of a Call Services Screen.....	2-3
Figure 2-2.	Example of a Listing Services Screen after a Residence Search.....	2-12
Figure 2-3.	Example of a Listing Services Screen after a Business Search.....	2-13
Figure 2-4.	Example of a Listing Services Screen after a Government Search.....	2-14
Figure 2-5.	Workstation	2-15
Figure 2-6.	Suggested Keyboard Key Locations.....	2-19
Figure 2-7.	Key Functions.....	2-20
Figure 2-8.	Operator Chair (Side View).....	2-22
Figure 2-9.	Operator Chair (Top View)	2-23
Figure 2-10.	Acoustic Sidetone Path Loss	2-28
Figure 2-11.	Longitudinal Balance Test at Operator Jack Interface	2-33
Figure 4-1.	Standalone Workstation Connected through OSS Switch.....	4-39
Figure 4-2.	Standalone Workstation Connected through IWSS.....	4-40

List of Tables

Table 2-1.	Operator Voice-Frequency Loss.....	2-31
