Notice Of Disclaimer	iii
Preface	Preface-1
1. Introduction	1-1
1.1 Purpose of Document	1-1
1.2 Scope	1-1
1.3 Content Overview	1-2
1.4 Criteria Classification	1-2
2. Assumptions Concerning the General Characteristics of the User, the NTE, and the Environment	2-1
2.1 The User	2-1
2.2 The Network Terminal Equipment	2-1
2.3 Environment	2-2
2.3.1 Aisle Environment	2-2
2.3.2 Central Location In Central Office	2-2
2.3.3 Operations Center	2-2
3. Network Terminal Equipment Criteria	3-1
3.1 General Criteria	3-1
3.1.1 Security	3-1
3.1.1.1 Log-on Procedures - Passwords	3-1
3.1.1.2 Administration	3-1
3.1.1.3 Audit Information	3-2
3.1.1.4 Structure of Code	3-2
3.1.1.5 Levels of Security	3-3
3.1.1.6 Keyboard Lock-out	3-3
3.1.1.7 Dial-Up Security	3-3
3.1.1.8 Access to Information	3-4
3.1.1.9 Validation of Releases/versions	3-4
3.1.1.10 Self-Diagnostic Capabilities	3-4
3.1.2 Displays	3-5
3.1.2.1 Display Operation	3-5
3.1.2.2 General Color Conventions for Lights	3-5
3.1.2.3 Alarm Lights	3-5
3.1.2.4 Power-On Lights	3-6
3.1.2.5 Viewing Angle	3-6
3.1.2.6 Display and Terminal Information	3-6
3.1.2.7 Display Protection	3-6
3.1.2.8 Indicator Light Positioning	3-6
3.1.2.9 Display Maintenance	3-7
3.1.2.10 Testing Displays and Lights	3-7
3.1.3 Manual Controls	3-7
3.1.3.1 Limited Use Requirement	3-7
3.1.3.2 Relationship to CID Control	3-7
3.1.3.3 Control Layout and Position	3-7

- 3.1.3.4 Control Feedback 3-8
- 3.1.3.5 Critical and/or Service Affecting Controls 3-8
- 3.1.3.6 Other Types of Controls 3-8
- 3.1.3.7 Switch Operation 3-8
- 3.1.3.8 Push Button Controls 3-9
- 3.1.4 Labels 3-9
 - 3.1.4.1 Word Choice 3-9
 - 3.1.4.2 Abbreviations 3-9
 - 3.1.4.3 Label Lettering Orientation 3-9
 - 3.1.4.4 Positioning 3-9
 - 3.1.4.5 Circuit Board Labels 3-10
 - 3.1.4.6 Contrast and Color 3-10
 - 3.1.4.7 Label Letter Size 3-11
 - 3.1.4.8 Temporary Labels 3-11
 - 3.1.4.9 Label Letter Font And Proportions 3-11
 - 3.1.4.10 Labels for Groups of Items 3-11
 - 3.1.4.11 Label Durability 3-11
 - 3.1.4.12 Safety Related Labels 3-12
- 3.1.5 Numbering 3-12
 - 3.1.5.1 A Standard Scheme 3-12
 - 3.1.5.2 Alphanumeric Separation 3-13
 - 3.1.5.3 Long Number Strings 3-13
 - 3.1.5.4 Confusable Letters And Numbers 3-13
- 3.1.6 Safety 3-13
 - 3.1.6.1 Weight of Components 3-13
 - 3.1.6.2 Component Positions 3-13
 - 3.1.6.3 Edges Which Can Cut 3-14
 - 3.1.6.4 Electrical Power 3-14
 - 3.1.6.5 Electric Shock or Startle 3-14
 - 3.1.6.6 Hot Surfaces and Pinch Points 3-14
 - 3.1.6.7 Protrusions 3-15
- 3.1.7 Training 3-15
 - 3.1.7.1 Length 3-15
 - 3.1.7.2 Availability 3-15
 - 3.1.7.3 Method 3-15
 - 3.1.7.4 Evaluation 3-15
- 3.1.8 Documentation 3-16
 - 3.1.8.1 Point Size of Type 3-16
 - 3.1.8.2 Structure 3-16
 - 3.1.8.3 Format 3-17
 - 3.1.8.4 Physical Characteristics 3-17
 - 3.1.8.5 Contents 3-17
 - 3.1.8.6 Potential Dangers or Damage 3-18
 - 3.1.8.7 Job Aids 3-18
- 3.1.9 Dialogue 3-19
 - 3.1.9.1 General 3-19
 - 3.1.9.2 Messages and Prompts 3-19

3.1.9.3	Entering Data	3-19
3.1.9.4	Mode of Operation and Position of Dialogue	3-20
3.1.9.5	Response Times	3-20
3.1.9.6	Error Messages	3-20
3.1.9.7	Error Validation and Recovery	3-21
3.1.9.8	Alarms	3-21
3.1.9.9	User Aids	3-22
3.2	Specific Criteria	3-22
3.2.1	Memory Components	3-22
3.2.1.1	Operation	3-22
3.2.1.2	Security and Protection	3-22
3.2.1.3	Off-line Memory	3-23
3.2.2	Circuit Boards	3-23
3.2.2.1	Circuit Board Seating	3-23
3.2.2.2	Circuit Board Faceplates	3-24
3.2.2.3	Circuit Board Latches	3-24
3.2.2.4	Circuit Board Insertion - Removal Force	3-24
3.2.2.5	Circuit Board Power Conditions	3-24
3.2.2.6	Circuit Board Weight	3-24
3.2.2.7	Circuit Board Size And Shape	3-24
3.2.2.8	Device Protection	3-25
3.2.2.9	Common Units	3-25
3.2.2.10	Exclusive Control of Parameters	3-25
3.2.3	Bay and Panel Layout and Considerations	3-25
3.3	NTE Criteria Related to Specific Operations	3-26
3.3.1	Installation	3-26
3.3.1.1	Cabling	3-26
3.3.1.2	Automatic Testing at Installation	3-26
3.3.1.3	Test Results	3-26
3.3.1.4	Special Installation Testing Equipment	3-26
3.3.2	Provisioning	3-26
3.3.2.1	In-Service Circuits	3-26
3.3.2.2	Sequence of Actions	3-26
3.3.3	Maintenance	3-27
3.3.3.1	Mode of Maintenance Operations	3-27
3.3.3.2	Maintenance Unit	3-27
3.3.3.3	Controller Effect on Service	3-27
3.3.3.4	Routine Maintenance	3-27
3.3.3.5	Audible Alarm Cut-Off Reactivation	3-27
3.3.3.6	Automatic Setting of a Replacement Unit	3-27
3.3.3.7	Automatic Testing of a Replacement Unit	3-27
3.3.3.8	Failures Which May Be Difficult To Isolate	3-28
3.3.3.9	One Failure, One Alarm	3-28
3.3.3.10	Power Failures	3-28
3.3.3.11	Maintenance Position	3-28
3.3.4	Circuit and Facility Testing	3-28
3.3.4.1	Compatibility With Existing Equipment and Procedures	3-28

3.3.4.2 Monitor Mode	3-29
3.3.4.3 Test Jacks	3-29
3.3.5 Trouble Isolation	3-29
3.3.5.1 Level of Automatic Trouble Isolation	3-29
3.3.5.2 Failure Information	3-29
3.3.5.3 Failure Lights	3-29
3.3.5.4 Special Test Equipment and Procedures	3-29
3.3.5.5 Service Affecting Activity	3-29
3.3.5.6 Restoral of Parameters	3-30
3.3.6 Generic Code Updating	3-30
3.3.6.1 Use of Software and Data Lines	3-30
3.3.6.2 Automatic Detection of Incompatibility	3-30
3.3.6.3 Generic ID	3-30
3.3.6.4 Non-Service Affecting Operation	3-30
3.3.6.5 Identification of New Generic Hardware	3-30
3.3.7 Adding to the NTE	3-30
3.3.8 Administration	3-31
Appendix A: Reference List - Internal Documents	A-1
Appendix B: Reference List — Public Documents	B-1
Appendix C: Craft Interface Devices - Monitors, Printers, Keyboards	C-1
Appendix D: Abbreviations and Acronyms	D-1
