GENERIC REQUIREMENTS NOTICE OF DISCLAIMER	iii
List of Figures	vii
List of Tables	ix
Preface	xi
The Telcordia Interactive GR Process	xi
FA-TA-TR to GR	xi
Transition Phase	xi
Comments and Issues List Report Mechanism	xii
GR-2840-CORE Current Maturity Level, Status and Plans	xii
Formatting Comments	xii
Where and When to Submit Comments	xiii
1. Introduction	1-1
1.1 Scope	1-1
1.2 Requirements Terminology	1-2
1.3 Requirement Labeling Conventions	1-3
1.3.1 Numbering of Requirement and Related Objects	1-3
1.3.2 Requirement, Conditional Requirement, and Objective Object Identification	1-3
2. Environmental Stressing	2-1
2.1 When to Perform Environmental Stressing	2-1
2.2 Cost Effectiveness of Environmental Stressing	2-2
2.2.1 Capital Costs added by Environmental Stressing	2-2
2.2.2 Annual Operating Costs generated by Environmental Stressing	2-2
2.2.3 Annual Operating Costs without Environmental Stressing	2-2
2.2.4 Savings in Annual Operating Costs	2-2
2.2.5 Return on Investment per Year	2-2
2.2.6 Payback Period in Years	2-3
2.3 Determination of the Environmental Stressing Protocol	2-3
2.3.1 Environmental Stressing Parameters	2-6
2.3.2 Operating and Technology Limits	2-6
2.3.3 Stress Measurement	2-7
2.3.4 Failure During Step Stress	2-9
2.3.5 Developing the Environmental Stressing Protocol	2-9
2.3.6 Environmental Stressing Protocol Proofing	2-11
2.4 Application of the Environmental Stressing Protocol	2-12
2.4.1 Stress Measurement	2-12
2.4.2 Environmental Stressing of a Product	2-12
2.4.3 Environmental Stressing Protocol Feedback	2-13
2.5 Reporting on Environmental Stressing	2-14

3. Conclusion 3-1

Appendix A: Requirement-Object List A-1

Appendix B: Examples of Cost/Benefit Analyses for Environmental Stressing B-1

 B.1 Case Study I B-1

 B.1.1 Capital Costs for Environmental Stressing B-1

 B.1.2 Annual Operating Costs with Environmental Stressing B-1

 B.1.3 Annual Operating Costs Using Traditional Burn-in B-1

 B.1.4 Savings in Annual Operating Costs B-2

 B.1.5 Return on Investment per Year B-2

 B.1.6 Payback Period in Years B-2

 B.2 Case Study II B-2

 B.2.1 Capital Costs for Environmental Stressing B-2

 B.2.2 Annual Operating Costs with Environmental Stressing B-3

 B.2.3 Annual Operating Costs Using Traditional Burn-in B-4

 B.2.4 Savings in Annual Operating Costs B-4

 B.2.5 Return on Investment per Year B-4

 B.2.6 Payback Period in Years B-5

Appendix C: Examples of Stress Stimuli C-1

 C.1 Temperature Cycling Stressing C-1

 C.2 Random Vibration Stressing C-2

 C.3 Power Cycling Stressing C-2

 C.4 Voltage Cycling Stressing C-2

Appendix D: Typical Defects Revealed Using Temperature Cycling and Vibration D-1

Appendix E: Examples of Environmental Stressing Protocols E-1

Appendix F: References F-1

Appendix G: Glossary G-1

Requirement-Object Index ROI-1

List of Figures

Figure 2-1	Environmental Stressing in Design and Production and Field . . .	2-4
Figure 2-2	Test-Analyze-Correct-Verify Process	2-5
Figure 2-3	Example of Product Limits Using Temperature as a Stimulus . . .	2-7
Figure 2-4	Relationship between Flaw Precipitation and Stimulus	2-10
Figure 2-5	Split Sample Population Stressing	2-13

List of Tables

Table 2-1	The Most Effective Way to Use Environmental Stressing	2-3
Table 2-2	Product Identification and Environmental Stressing Overview . .	2-15
Table 2-3	Environmental Stressing Protocol	2-15
Table 2-4	Results of the Application of the Environmental Stressing Protocol	2-16
Table D-1	Typical Defects Detected During Environmental Stressing Using Thermal Cycling and Vibration	D-1
