Telcordia GR-2900-Documentation Information

1. Introduction	1-1
1.1 Purpose and Scope	1-1
1.2 Relationship With Other GRs	1-1
1.3 Requirements Terminology	1-2
1.4 Requirements Labeling Conventions	1-3
1.4.1 Numbering of Requirements and Related Objects	1-3
1.4.2 Requirement, Conditional Requirement, and Objective Object Identification	1-3
1.5 Organization	1-3
2. VDT Network and Backbone Architecture	2-1
2.1 Video Dial Tone Network	2-1
2.2 SONET-Based VDT Backbone Architectures	2-2
2.2.1 Example Point-to-Point Architectures	2-2
2.2.2 Example Ring Architectures	2-3
3. SONET Multiplex Equipment	3-1
3.1 SONET Linear Add-Drop Multiplexers	3-1
3.1.1 Bidirectional Point-to-Point Systems	3-2
3.1.1.1 SONET Overhead	3-2
3.1.2 Unidirectional Point-to-Point Systems	3-5
3.1.2.1 SONET Overhead for Unidirectional Systems	3-6
3.1.3 Bidirectional Asymmetric Point-to-Point Systems	3-9
3.1.3.1 SONET Overhead for Bidirectional Asymmetric Systems	3-10
3.2 SONET Rings	3-11
3.2.1 Unidirectional Path Switched Rings (UPSR)	3-11
3.2.2 Bidirectional Line Switched Rings (BLSR)	3-13
3.2.3 Multicast Video Traffic on Rings	3-13
3.2.4 SONET Overhead for Rings Supporting Unidirectional Video Traffic	3-13
4. SONET Asymmetric Multiplex Equipment and Operations Criteria	4-1
4.1 Unidirectional Point-to-Point Systems	4-1
4.1.1 Equipment Criteria	4-1
4.1.2 Operations Criteria	4-3
4.1.2.1 Operations Communications	4-3
4.1.2.2 Alarm Surveillance	4-4
4.1.2.3 Performance Monitoring	4-5
4.1.2.4 Testing Process	4-6
4.2 Bidirectional Asymmetric Point-to-Point Systems	4-7
4.2.1 Equipment Criteria	4-7

4.2.2 Operations Criteria	4-8
4.2.2.1 Operations Communications	4-8
4.2.2.2 Alarm Surveillance	4-8
4.2.2.3 Performance Monitoring	4-9
4.2.2.4 Testing Process	4-11
4.3 UPSRs	4-12
4.4 BLSRs	4-12
Requirement-Object List	ROL-1
Appendix A: References	A-1
Appendix B: Glossary	B-1

List of Figures

Figure 2-1	Video Dial Tone Network	2-1
Figure 2-2	Point-to-Point Systems	2-2
Figure 2-3	UPSR for Video Distribution	2-3
Figure 2-4	BLSR for Video Distribution	2-4
Figure 3-1	Bidirectional Symmetric OC-N SONET System	3-2
Figure 3-2	Unidirectional Point-to-Point SONET System	3-6
Figure 3-3	Bidirectional Asymmetric SONET System	3-10
Figure 3-4	Unidirectional Path Switched Ring	3-12
Figure 3-5	Bidirectional Line Switched Ring	3-15
