

# Generic Requirements for Data Elements Used With Fiber Management Software Systems

## Contents

Preface .....	Preface-1
1. Introduction.....	1-1
1.1 Overview .....	1-1
1.2 Purpose and Scope .....	1-2
1.3 Organization of This Document.....	1-2
1.4 Requirements Terminology.....	1-3
1.5 Requirement Labeling Conventions.....	1-4
1.5.1 Numbering of Requirement and Related Objects .....	1-4
1.5.2 Requirement, Conditional Requirement, and Objective Object Identification .....	1-4
2. Fiber Management Overview.....	2-1
2.1 Introduction .....	2-1
2.2 Fiber Distributing Frames .....	2-2
2.3 Fiber Management Issues.....	2-2
2.4 Fiber Administration System .....	2-4
2.5 Value of Mechanized Fiber Management .....	2-5
2.6 Data Consistency.....	2-7
3. Fiber Management Issues.....	3-1
3.1 Common Data Elements .....	3-1
3.2 Data Flows .....	3-1
3.3 Data Creation and Maintenance .....	3-2
3.3.1 Data Creation .....	3-2
3.3.1.1 Capacity Provisioning.....	3-2
3.3.1.2 Service Provisioning.....	3-4
3.4 Who Needs What Data.....	3-5
3.4.1 Marketing .....	3-5
3.4.2 Long-Range Planners .....	3-6
3.4.3 Fundamental Planners .....	3-6
3.4.4 Equipment Engineers .....	3-6
3.4.5 OSP Engineers .....	3-6
3.4.6 CO Engineers .....	3-6
3.4.7 Operations Staffs.....	3-7
3.4.8 Maintenance & Repair Organizations.....	3-7
3.4.9 Provisioning Centers .....	3-7
3.5 Placement of Interface.....	3-7

---

---

3.6	Economic Considerations.....	3-8
3.7	Supplier-Provided Training.....	3-8
4.	Operations System .....	4-1
4.1	Impacted Operations Systems .....	4-1
4.2	The TIRKS System .....	4-1
4.3	Telecommunications Management Network (TMN).....	4-2
4.3.1	TMN and the Telecommunications Network.....	4-3
4.3.2	Benefits of Implementing a TMN .....	4-4
4.3.3	TMN Overview: The Logical Architecture .....	4-4
4.3.4	Management Functional Areas .....	4-5
4.3.5	Management Layers.....	4-6
4.3.6	Principles for Implementing a TMN.....	4-7
4.3.7	Building Block Approach .....	4-8
4.3.8	INA Distributed Architecture.....	4-8
4.3.9	Open Interfaces .....	4-9
4.3.10	Strategies for Implementing the TMN Layered Architecture.....	4-9
4.3.11	Characteristics of Products Consistent with TMN Principles.....	4-10
4.3.12	Logical Layered Architecture .....	4-11
4.3.13	Management Functional Areas .....	4-11
4.3.14	Open Standard Interfaces .....	4-12
4.3.15	Information Models.....	4-13
4.3.16	Configuration Management .....	4-13
4.3.17	Fault Management.....	4-15
4.3.18	Security Management .....	4-17
4.3.19	Common Operations Management .....	4-20
5.	Information on Data Elements .....	5-1
5.1	Polarization Mode Dispersion Data Elements: R6-92 [92] to R6-95 [95].....	5-1
5.2	Outside Plant Data Elements: R6-42 [42] through R6-80 [80].....	5-2
5.2.1	Fiber Plant: Cable Makeup and Levels of Organization.....	5-2
5.2.2	Outside Plant Route Characterization .....	5-2
6.	Requirements and Objectives.....	6-1
6.1	Overall Data Requirements .....	6-2
6.2	Fiber Distributing Frame Parameters .....	6-3
6.3	Jumper Parameters .....	6-6
6.4	Equipment Parameters .....	6-9
6.5	Outside Plant (OSP) Facilities Parameters.....	6-11
6.5.1	Segment Characteristics .....	6-11
6.5.2	Sheath Characteristics .....	6-12
6.5.3	Cable Characteristics.....	6-12
6.5.3.1	Construction Characteristics.....	6-14
6.5.3.2	Tube/Ribbon Characteristics .....	6-14
6.5.3.3	Fiber Characteristics .....	6-15
6.5.4	Outside Plant Component Elements .....	6-16

---

6.6	Transmission System Parameters.....	6-21
6.7	Circuit Management Parameters .....	6-28
References	.....	References-1
Bibliography	.....	Bibliography-1
Acronyms.....	.....	Acronyms-1
Glossary .....	.....	Glossary-1
Requirement-Object List .....	.....	ROL-1

## List of Figures

Figure 2-1.	Typical Fiber Cross-Connect Architecture Within a Central Office .....	2-2
Figure 2-2.	Fiber Administration System Interfaces .....	2-3
Figure 2-3.	Fiber Administration System Contents Universe .....	2-6
Figure 3-1.	Typical Flow of Information by Function .....	3-2
Figure 4-1.	TMN Layers and Management Functional Areas .....	4-5
Figure 4-2.	M.3010 Reference Model of OS Functional Architecture .....	4-12
Figure 4-3.	Partitioning of TMN Security Functionality .....	4-17
Figure 5-1.	Layers of Organization for Fiber Cabling .....	5-3
Figure 5-2.	Route Characterization Components .....	5-4

## List of Tables

Table 2-1.FDF Density and Fiber Terminations .....	2-5
Table 4-1. Configuration Management .....	4-14
Table 4-2. Fault Management .....	4-16
Table 4-3. Security Management .....	4-19
