# Fault Management Based on the Telecommunications Management Network (TMN) Architecture

## Contents

Preface .....	Preface-1
1. Introduction .....	1-1
1.1 Business Drivers.....	1-1
1.2 Purpose and Scope .....	1-1
1.3 Audience .....	1-2
1.4 Discussion of Business Drivers.....	1-3
1.4.1 Savings of Repair Costs .....	1-3
1.4.2 Proactive Maintenance.....	1-4
1.4.3 Trouble Administration.....	1-4
1.4.4 Quality Assurance .....	1-5
1.5 Overview of the TMN Functional Architecture.....	1-6
1.6 Document Organization .....	1-6
1.7 Requirements Terminology.....	1-7
1.8 Requirement Labeling Conventions.....	1-8
1.8.1 Numbering of Requirement and Related Objects .....	1-8
1.8.2 Requirement and Objective Object Identification .....	1-9
2. Basic Principles.....	2-1
2.1 Fault Management Overview.....	2-1
2.1.1 Faults and their root causes .....	2-1
2.1.2 Detection of faults .....	2-2
2.1.3 Proactive maintenance .....	2-2
2.1.4 Service restoration after detection of a fault .....	2-3
2.1.5 Determination of the root cause .....	2-3
2.1.6 Repair .....	2-3
2.1.7 Interaction with the customer.....	2-3
2.1.8 Cooperation with other jurisdictions.....	2-4
2.1.9 Quality Assurance .....	2-5
2.1.9.1 Quality Measurements.....	2-5
2.1.9.2 Survivability (reports of severe problems) .....	2-7
2.2 What the NE Provides.....	2-8
2.3 Fault Management Systems in the TMN Environment.....	2-9
2.4 TMN Management Application Functions .....	2-9
3. Network Resource Entities and Terminology.....	3-1
3.1 TMN Layers and Their Domains .....	3-1

---

3.2	Network Resource Entities .....	3-2
3.2.1	Network Elements (NEs) .....	3-3
3.2.1.1	Transport NEs .....	3-4
3.2.1.2	Congestible NEs .....	3-4
3.2.1.3	Subscriber access NEs .....	3-4
3.2.1.4	Signaling NEs .....	3-5
3.2.2	Paths .....	3-5
3.2.2.1	Trails .....	3-5
3.2.2.2	Connections .....	3-7
3.2.3	Monitoring Points .....	3-7
3.2.3.1	Equipment monitoring points .....	3-7
3.2.3.2	Trail termination points .....	3-7
3.2.3.3	Intermediate monitoring points.....	3-8
3.2.3.4	Environmental monitoring points.....	3-8
3.2.4	Facilities .....	3-8
3.2.5	Circuits .....	3-9
3.2.6	Test access points.....	3-9
3.2.7	Networks .....	3-9
3.2.7.1	Subnetworks .....	3-9
3.2.7.2	Links .....	3-10
3.2.8	Service instances .....	3-10
4.	RAS Quality Assurance .....	4-1
4.1	EML .....	4-1
4.1.1	NE(s) outage reporting .....	4-1
4.2	NML .....	4-6
4.2.1	Network outage reporting .....	4-6
4.3	SML .....	4-9
4.3.1	Service outage reporting .....	4-9
4.4	BML .....	4-12
4.4.1	Network RAS goal setting .....	4-12
4.4.2	Service availability goal setting .....	4-13
4.4.3	RAS assessment .....	4-14
5.	Alarm Surveillance .....	5-1
5.1	EML .....	5-2
5.1.1	Alarm reporting .....	5-2
5.1.1.1	Failure processing .....	5-2
5.1.1.2	Notification logging .....	5-5
5.1.1.3	Message inhibition.....	5-8
5.1.2	Alarm summary.....	5-9
5.1.3	Alarm event criteria .....	5-10
5.1.4	Alarm indication management .....	5-12
5.1.5	Log control .....	5-14
5.1.6	Alarm correlation and filtering .....	5-16

---

---

5.1.6.1	Processing of equipment alarms .....	5-16
5.1.6.2	Processing of communication alarms .....	5-16
5.1.6.3	Processing of environmental alarms .....	5-17
5.1.6.4	Processing of state changes .....	5-17
5.1.6.5	Correlation of alarms .....	5-18
5.1.6.6	Message inhibition.....	5-19
5.1.6.7	Alarm resynchronization .....	5-20
5.1.6.8	Message logging .....	5-22
5.1.6.9	Persistence analysis .....	5-22
5.1.6.10	Sending fault indications to NE(s) fault localization.....	5-24
5.1.6.11	Sending fault indications to NE(s) status and control .....	5-25
5.2	NML .....	5-26
5.2.1	Alarm status modification .....	5-26
5.2.2	Network fault event analysis, including correlation and filtering....	5-27
5.2.2.1	Correlation of fault indications along a trail.....	5-29
5.2.2.2	Correlation of fault indications among related trails .....	5-30
5.2.2.3	Forwarding of fault indications .....	5-30
5.2.2.4	Interactions with Configuration Management .....	5-32
5.3	SML.....	5-33
5.4	BML .....	5-33
5.4.1	Alarm policy .....	5-33
5.4.1.1	Control of Alarm event criteria.....	5-33
5.4.1.2	Control of Alarm indication management .....	5-34
5.4.1.3	Control of Alarm correlation and filtering.....	5-35
5.4.1.4	Control of Alarm status modification .....	5-35
6.	Fault Localization .....	6-1
6.1	EML .....	6-1
6.1.1	NE(s) fault localization .....	6-1
6.1.1.1	Control of scheduled exercises, diagnostics, and audits....	6-2
6.1.1.2	On-demand diagnostics, exercises, and audits .....	6-3
6.1.1.3	Fault localization flows.....	6-5
6.1.1.4	Interaction with Configuration Management.....	6-7
6.1.1.5	Policy inputs for on-demand fault localization.....	6-8
6.2	NML .....	6-9
6.2.1	Network fault localization.....	6-9
6.2.1.1	Event inputs .....	6-10
6.2.1.2	Network fault localization process .....	6-11
6.2.1.3	Pattern analysis .....	6-17
6.2.1.4	Persistence analysis .....	6-18
6.2.1.5	Trouble Ticket Requests .....	6-20
6.2.1.6	Reporting to Status and Control MAFs .....	6-21
6.2.1.7	Trouble report creation and update.....	6-22
6.2.1.8	Fault localization procedure initiation and processing ....	6-22
6.2.1.9	Circuit test initiation and processing .....	6-24

---

---

6.2.1.10	External condition processing.....	6-26
6.2.1.11	Network topology database .....	6-27
6.2.1.12	Interactions with Configuration Management.....	6-28
6.3	SML.....	6-30
6.3.1	Verification of parameters and connectivity.....	6-30
6.3.1.1	Service instance identification.....	6-31
6.3.1.2	Verification request processing .....	6-32
6.4	BML.....	6-33
6.4.1	Fault localization policy.....	6-33
6.4.1.1	Control of NE(s) fault localization .....	6-34
6.4.1.2	Control of Network fault localization.....	6-35
7.	Fault Correction .....	7-1
7.1	EML.....	7-1
7.1.1	NE(s) fault correction.....	7-1
7.2	NML.....	7-5
7.2.1	Scheduling and dispatch administration of repair force.....	7-5
7.2.1.1	Management of assignment queues for new and changed trouble tickets.....	7-6
7.2.1.2	Determination of next task.....	7-7
7.2.1.3	Assignment of forces and other repair resources to a task	7-8
7.2.1.4	Borrowing circuit and NE components .....	7-12
7.2.1.5	Routing of mobile forces .....	7-14
7.2.1.6	Testing tasks .....	7-16
7.2.1.7	Completion .....	7-16
7.2.1.8	Administration of repair resources .....	7-17
7.3	SML.....	7-19
7.3.1	Arrangement of repair with customer .....	7-19
7.4	BML.....	7-21
7.4.1	Management of repair process .....	7-21
8.	Testing.....	8-1
8.1	EML.....	8-1
8.1.1	Test access configuration.....	8-1
8.1.2	Test circuit configuration.....	8-1
8.1.3	NE(s) test control .....	8-1
8.1.4	Results and status reporting .....	8-2
8.1.5	Test access path management .....	8-2
8.2	NML.....	8-2
8.2.1	Circuit selection, test correlation and fault location .....	8-2
8.2.2	Selection of test suite .....	8-2
8.2.3	Test access network control and recovery .....	8-2
8.3	SML.....	8-2
8.3.1	Service test .....	8-2
8.4	BML.....	8-3

---

---

8.4.1	Test point policy.....	8-3
9.	Trouble Administration.....	9-1
9.1	EML .....	9-2
9.2	NML .....	9-3
9.2.1	Trouble ticket administration .....	9-3
9.3	SML.....	9-7
9.3.1	Trouble reporting .....	9-8
9.3.2	Trouble report status change notification.....	9-14
9.3.3	Trouble information query .....	9-16
9.3.4	Trouble ticket creation notification.....	9-19
9.3.5	Management of trouble by service customer .....	9-20
9.4	BML .....	9-21
9.4.1	Trouble report policy .....	9-21
Appendix A:	Cross-Reference Tables for Interactions.....	A-1
A.1	Introduction .....	A-1
A.2	RAS Quality Assurance .....	A-2
A.2.1	BML .....	A-2
A.2.2	SML .....	A-4
A.2.3	NML.....	A-6
A.2.4	EML .....	A-8
A.3	Alarm Surveillance.....	A-8
A.3.1	BML .....	A-8
A.3.2	NML.....	A-9
A.3.3	EML .....	A-11
A.4	Fault Localization.....	A-14
A.4.1	BML .....	A-14
A.4.2	SML .....	A-14
A.4.3	NML.....	A-15
A.4.4	EML .....	A-18
A.5	Fault Correction .....	A-19
A.5.1	BML .....	A-19
A.5.2	SML .....	A-20
A.5.3	NML.....	A-21
A.5.4	EML .....	A-25
A.6	Trouble Administration.....	A-26
A.6.1	BML .....	A-26
A.6.2	SML .....	A-28
A.6.3	NML.....	A-33
Appendix B:	Cross-Reference Table for Management Application Functions.....	B-1
References	.....	References-1
Acronyms.....	.....	Acronyms-1

## List of Tables

Table 2-1.	Fault Management MAF Matrix.....	2-10
Table 4-1.	NE(s) outage reporting: Criteria for Reporting .....	4-4
Table 5-1.	Severity Levels .....	5-11
Table 5-2.	Event Type Components .....	5-11
Table 5-3.	Alarm Modification Example .....	5-27
Table 5-4.	Significance of Fault Indications.....	5-29
Table A-1.	Network RAS goal setting - RAS assessment .....	A-2
Table A-2.	Network RAS goal setting - Network outage reporting .....	A-2
Table A-3.	Network RAS goal setting - NE(s) outage reporting.....	A-2
Table A-4.	Service availability goal setting - RAS assessment.....	A-2
Table A-5.	Service availability goal setting - Service outage reporting .....	A-3
Table A-6.	Service availability goal setting - Trouble information query.....	A-3
Table A-7.	RAS assessment - Service outage reporting .....	A-3
Table A-8.	RAS assessment - Network outage reporting .....	A-3
Table A-9.	RAS assessment - Trouble information query.....	A-3
Table A-10.	RAS assessment - Material management (CM) .....	A-4
Table A-11.	Service outage reporting - Network outage reporting .....	A-4
Table A-12.	Service outage reporting - Service status administration (CM) .....	A-4
Table A-13.	Service outage reporting - Leased circuit network status (CM).....	A-4
Table A-14.	Service outage reporting - Access circuit design (CM).....	A-5
Table A-15.	Service outage reporting - Leased circuit design (CM).....	A-5
Table A-16.	Service outage reporting - Network infrastructure design (CM).....	A-5
Table A-17.	Service outage reporting - Assignable inventory management (CM) .....	A-5
Table A-18.	Service outage reporting - Traffic control (PM).....	A-5
Table A-19.	External relations (CM) - Service outage reporting .....	A-6
Table A-20.	Network outage reporting - NE(s) outage reporting.....	A-6
Table A-21.	Network outage reporting - Network infrastructure design (CM).....	A-6
Table A-22.	Network outage reporting - Access infrastructure design (CM) .....	A-6
Table A-23.	Network outage reporting - Facility infrastructure design (CM) .....	A-7
Table A-24.	Network outage reporting - Interexchange circuit design (CM) .....	A-7
Table A-25.	Network outage reporting - Access circuit design (CM).....	A-7
Table A-26.	Network outage reporting - Leased circuit design (CM).....	A-7
Table A-27.	Network outage reporting - Facility design (CM).....	A-7
Table A-28.	Network outage reporting - Transport network status (CM).....	A-8
Table A-29.	NE(s) outage reporting - NE(s) status and control (CM) .....	A-8
Table A-30.	Alarm policy - Alarm status modification.....	A-8
Table A-31.	Alarm policy - Alarm event criteria .....	A-9
Table A-32.	Alarm policy - Alarm indication management .....	A-9
Table A-33.	Alarm policy - Alarm correlation and filtering .....	A-9
Table A-34.	Network fault event analysis, including correlation and filtering - Alarm status modification.....	A-9

---

---

Table A-35.	Network fault event analysis, including correlation and filtering - Facility design (CM).....	A-10
Table A-36.	Network fault event analysis, including correlation and filtering - Circuit inventory notification (CM).....	A-10
Table A-37.	Network fault event analysis, including correlation and filtering - Transport network status (CM) .....	A-10
Table A-38.	Traffic control (PM) - Network fault event analysis, including correlation and filtering.....	A-10
Table A-39.	Alarm status modification - Alarm correlation and filtering .....	A-11
Table A-40.	Alarm reporting - Alarm summary .....	A-11
Table A-41.	Alarm reporting - Alarm event criteria.....	A-11
Table A-42.	Alarm reporting - Failure event detection and reporting .....	A-11
Table A-43.	Alarm reporting -Automatic restoration .....	A-12
Table A-44.	Alarm reporting - Detection, counting, storage and reporting (PM) .....	A-12
Table A-45.	Alarm indication management - Failure event detection and reporting .....	A-12
Table A-46.	Log control - Alarm reporting .....	A-12
Table A-47.	Alarm correlation and filtering - Alarm reporting.....	A-12
Table A-48.	Alarm correlation and filtering - Alarm summary.....	A-13
Table A-49.	Alarm correlation and filtering - NE(s) fault localization .....	A-13
Table A-50.	Alarm correlation and filtering - NE(s) design (CM).....	A-13
Table A-51.	Alarm correlation and filtering - NE(s) configuration (CM).....	A-13
Table A-52.	Alarm correlation and filtering - NE(s) status and control (CM) .....	A-13
Table A-53.	Fault localization policy - Network fault localization .....	A-14
Table A-54.	Fault localization policy - NE(s) fault localization .....	A-14
Table A-55.	Verification of parameters and connectivity - Service status administration (CM) .....	A-14
Table A-56.	Verification of parameters and connectivity - Circuit inventory query (CM) .....	A-15
Table A-57.	Network fault localization - Network fault event analysis, including correlation and filtering .....	A-15
Table A-58.	Network fault localization - NE(s) fault localization .....	A-15
Table A-59.	Network fault localization - Circuit selection, test correlation and fault location .....	A-15
Table A-60.	Network fault localization - Trouble reporting.....	A-16
Table A-61.	Network fault localization - Trouble information query .....	A-16
Table A-62.	Network fault localization - Trouble ticket administration .....	A-16
Table A-63.	Network fault localization - Network infrastructure design (CM) .....	A-16
Table A-64.	Network fault localization - Facility design (CM) .....	A-17
Table A-65.	Network fault localization - Circuit inventory notification (CM) .....	A-17
Table A-66.	Network fault localization - Transport network status (CM) .....	A-17
Table A-67.	Network fault localization - NE(s) status and control (CM) .....	A-17
Table A-68.	Network fault localization - Network performance monitoring event correlation and filtering (PM).....	A-18
Table A-69.	NE(s) fault localization - Running of diagnostic.....	A-18

---

---

Table A-70.	NE(s) fault localization - NE(s) fault correction .....	A-18
Table A-71.	NE(s) fault localization - NE(s) configuration (CM) .....	A-18
Table A-72.	Management of repair process - Service outage reporting .....	A-19
Table A-73.	Management of repair process - Network outage reporting .....	A-19
Table A-74.	Management of repair process - NE(s) outage reporting .....	A-19
Table A-75.	Management of repair process - Arrangement of repair with customer	A-19
Table A-76.	Management of repair process - Scheduling and dispatch administration of repair force.....	A-20
Table A-77.	Management of repair process - Trouble ticket administration.....	A-20
Table A-78.	Arrangement of repair with customer - Scheduling and dispatch administration of repair force .....	A-20
Table A-79.	Arrangement of repair with customer - Solution proposal (CM) .....	A-20
Table A-80.	Scheduling and dispatch administration of repair force - Network fault event analysis, including correlation and filtering .....	A-21
Table A-81.	Scheduling and dispatch administration of repair force - Management of repair process .....	A-21
Table A-82.	Scheduling and dispatch administration of repair force - Arrangement of repair with customer .....	A-21
Table A-83.	Scheduling and dispatch administration of repair force - NE(s) fault correction .....	A-21
Table A-84.	Scheduling and dispatch administration of repair force - Service test ..	A-22
Table A-85.	Scheduling and dispatch administration of repair force - Circuit selection, test correlation and fault location .....	A-22
Table A-86.	Scheduling and dispatch administration of repair force - Trouble information query .....	A-22
Table A-87.	Scheduling and dispatch administration of repair force - Trouble ticket administration .....	A-22
Table A-88.	Scheduling and dispatch administration of repair force - Routing design (CM) .....	A-23
Table A-89.	Scheduling and dispatch administration of repair force - Material management (CM) .....	A-23
Table A-90.	Scheduling and dispatch administration of repair force - Provisioning policy (CM) .....	A-23
Table A-91.	Scheduling and dispatch administration of repair force - Access circuit design (CM) .....	A-23
Table A-92.	Scheduling and dispatch administration of repair force - Leased circuit design (CM) .....	A-24
Table A-93.	Scheduling and dispatch administration of repair force - Facility design (CM) .....	A-24
Table A-94.	Scheduling and dispatch administration of repair force - Transport network status (CM) .....	A-24
Table A-95.	Scheduling and dispatch administration of repair force - NE(s) status and control (CM) .....	A-24
Table A-96.	NE(s) fault correction - Alarm correlation and filtering.....	A-25

---

---

Table A-97. NE(s) fault correction - Automatic restoration.....	A-25
Table A-98. NE(s) fault correction - Software administration (CM) .....	A-25
Table A-99. NE(s) fault correction - NE(s) administration (CM) .....	A-25
Table A-100. NE(s) fault correction - NE(s) database management (CM) .....	A-26
Table A-101. NE(s) fault correction - Access to parameters and cross-connects in NEs (CM) .....	A-26
Table A-102. NE(s) fault correction - NE(s) status and control (CM) .....	A-26
Table A-103. Trouble report policy - Trouble reporting .....	A-26
Table A-104. Trouble report policy - Trouble report status change notification.....	A-27
Table A-105. Trouble report policy - Trouble information query .....	A-27
Table A-106. Trouble report policy - Trouble ticket creation notification.....	A-27
Table A-107. Trouble report policy - Trouble ticket administration .....	A-27
Table A-108. Trouble reporting - Verification of parameters and connectivity .....	A-28
Table A-109. Trouble reporting - Arrangement of repair with customer .....	A-28
Table A-110. Trouble reporting - Service test .....	A-28
Table A-111. Trouble reporting - Trouble information query .....	A-28
Table A-112. Trouble reporting - Trouble ticket administration .....	A-29
Table A-113. Trouble reporting - Customer identification (CM).....	A-29
Table A-114. Trouble reporting - Solution proposal (CM) .....	A-29
Table A-115. Trouble reporting - Priority service restoration (CM) .....	A-29
Table A-116. Trouble reporting - Leased circuit network status (CM).....	A-30
Table A-117. Trouble reporting - Transport network status (CM).....	A-30
Table A-118. Trouble report status change notification - Trouble information query	A-30
Table A-119. Trouble information query - Service outage reporting .....	A-30
Table A-120. Trouble information query - Solution proposal (CM) .....	A-30
Table A-121. Trouble information query - Service status administration (CM) .....	A-31
Table A-122. Trouble information query - Leased circuit network status (CM).....	A-31
Table A-123. Trouble information query - Totaling usage charges (AM) .....	A-31
Table A-124. Trouble ticket creation notification - Trouble information query .....	A-31
Table A-125. Management of trouble by service customer - Trouble reporting .....	A-31
Table A-126. Management of trouble by service customer - Trouble report status change notification.....	A-32
Table A-127. Management of trouble by service customer - Trouble information query.... A-32	
Table A-128. Management of trouble by service customer - Trouble ticket creation notification.....	A-32
Table A-129. Management of trouble by service customer - Trouble ticket administration A-32	
Table A-130. Management of trouble by service customer - Provisioning policy (CM) A- 33	
Table A-131. Trouble ticket administration - Trouble report status change notification A- 33	
Table A-132. Trouble ticket administration - Trouble information query.....	A-33
