# Solder Mask, Conformal Coating, and Repair Polymer Certification

## Contents

1. Introduction.....	1-1
2. Certification Assessment.....	2-1
2.1 Applicability.....	2-1
2.2 Procedures.....	2-1
2.2.1 Selection of Sample.....	2-1
2.2.2 Criteria Set.....	2-1
2.2.3 Use of Manufacturer's Data.....	2-1
2.2.4 Observation of Tests.....	2-2
2.2.5 Retesting.....	2-2
2.2.6 Results Documented in a Test Conformance Report.....	2-2
2.2.7 Recertification.....	2-2
2.3 Criteria Set.....	2-3
3. Certification Mark Support.....	3-1
3.1 Notification and Assessment of Product/Process Change.....	3-1
3.2 Spot Checking.....	3-1
4. Test Procedures and Criteria.....	4-1
4.1 Visual.....	4-1
4.2 Adhesion Test.....	4-1
4.3 Abrasion Test.....	4-1
4.4 Flammability Test.....	4-1
4.5 Resistance to Soldering Test.....	4-2
4.6 Hydrolytic Stability and Corrosion Test.....	4-2
4.7 Dielectric Strength Test.....	4-2
4.8 Surface Insulation Resistance Test.....	4-2
4.8.1 Sample Coupon Preparation.....	4-2
4.8.2 Surface Insulation Resistance Test Procedure.....	4-2
4.9 Electromigration Test.....	4-2
4.9.1 Sample Coupon Preparation.....	4-2
4.9.2 Electromigration Test Procedure.....	4-3
4.10 Endurance Tests.....	4-3
4.10.1 85°C/85% RH Test.....	4-3
4.10.2 Temperature-Humidity Cycling Tests.....	4-3
References.....	References-1
