Special Report Notice Of Disclaimer . . . . .	iii
List of Figures . . . . .	viii
List of Tables . . . . .	ix
Foreword . . . . .	xi
1. Introduction . . . . .	1-1
1.1 Background . . . . .	1-1
1.2 SIP History . . . . .	1-2
1.3 Role of SIP . . . . .	1-3
1.4 How SIP is Used . . . . .	1-3
1.5 High-Level Description of SIP . . . . .	1-4
1.6 Motivations for Implementing SIP . . . . .	1-6
1.7 Features and Services a SIP Network Can Provide . . . . .	1-8
1.8 Industry Trends Regarding SIP . . . . .	1-9
1.9 Relationship of SIP to NGN, H.323, and BICC . . . . .	1-10
1.9.1 Relationship to NGN . . . . .	1-10
1.9.2 Relationship to H.323 . . . . .	1-10
1.9.3 Relationship to Bearer Independent Call Control (BICC) . . . . .	1-11
1.10 SIP for Telephony . . . . .	1-14
2. SIP Functional Description - Use of SIP for Voice and Multimedia Communication . . . . .	2-1
2.1 SIP - A Closer Look . . . . .	2-1
2.2 Telephony Capabilities . . . . .	2-14
2.3 Multimedia Capabilities . . . . .	2-16
2.4 SIP Support for Mobility . . . . .	2-17
2.5 Interworking with PSTN Networks . . . . .	2-17
2.6 Implementation Concerns . . . . .	2-19
2.7 Status of Standards . . . . .	2-21
3. Packet Network Architecture for Supporting SIP . . . . .	3-1
3.1 SIP Architecture and Functional Elements/Components . . . . .	3-1
3.2 Core Network . . . . .	3-2
3.3 Access Network . . . . .	3-4
3.4 Servers and Clients . . . . .	3-5
3.4.1 Proxy Server . . . . .	3-5
3.4.2 Redirect Server . . . . .	3-7
3.4.3 Location Server . . . . .	3-7
3.4.4 User Agent Server . . . . .	3-7
3.4.5 User Agent Client . . . . .	3-8
3.5 Protocol . . . . .	3-8
3.5.1 SIP Register Method . . . . .	3-9
3.5.2 SIP Invite Method . . . . .	3-10
3.5.3 SIP Responses to Requests . . . . .	3-10
3.5.4 SIP ACK Method . . . . .	3-15
3.5.5 SIP BYE Method . . . . .	3-15

3.5.6 SIP Options Method . . . . .	3-15
3.5.7 SIP Cancel Method . . . . .	3-16
3.5.8 SIP Headers - An Overview . . . . .	3-16
3.5.9 Message Body . . . . .	3-17
3.5.10 SIP Protocol Extensions . . . . .	3-17
4. Currently Available SIP Products . . . . .	4-1
4.1 3Com . . . . .	4-2
4.1.1 SIP Phones . . . . .	4-2
4.1.1.1 SIP Phone with PDA Phone Control Application . . . . .	4-2
4.1.2 SIP Servers . . . . .	4-4
4.1.2.1 SIP Signaling Server . . . . .	4-4
4.1.2.2 SIP Support System . . . . .	4-5
4.1.3 SIP Software Development Tools . . . . .	4-6
4.1.3.1 SIP SDK . . . . .	4-6
4.2 dynamicsoft . . . . .	4-7
4.2.1 SIP Servers . . . . .	4-7
4.2.1.1 SIP Proxy Server 4.0 . . . . .	4-7
4.2.1.2 SIP Location Server 2.0 . . . . .	4-8
4.2.2 SIP Software Development Tools . . . . .	4-9
4.2.2.1 SIP User Agent Stack . . . . .	4-9
4.3 Hotsip . . . . .	4-11
4.3.1 SIP Clients . . . . .	4-11
4.3.1.1 Active Addressbook . . . . .	4-11
4.3.2 SIP PIM Software . . . . .	4-12
4.3.2.1 Active Presence Mobile . . . . .	4-12
4.3.2.2 Active Presence for Broadband . . . . .	4-13
4.4 Hughes Software Systems . . . . .	4-15
4.4.1 SIP Software Development Tools . . . . .	4-15
4.4.1.1 SIP Stack . . . . .	4-15
4.4.1.2 SIPLite . . . . .	4-16
4.4.1.3 SIP User Agent Application Development Framework . . . . .	4-16
4.4.1.4 SIP Server Application Development Frameworks . . . . .	4-17
4.5 Indigo . . . . .	4-19
4.5.1 SIP Clients . . . . .	4-19
4.5.1.1 SIP User Agent . . . . .	4-19
4.5.1.2 Indigo CPL Editor . . . . .	4-20
4.5.2 SIP Servers . . . . .	4-21
4.5.2.1 Indigo SIP Proxy Server . . . . .	4-21
4.5.2.2 Indigo SIP Registrar Server . . . . .	4-22
4.5.2.3 Indigo SIP Location Server . . . . .	4-23
4.5.3 SIP PIM Software . . . . .	4-24
4.5.3.1 PIM Client . . . . .	4-24
4.5.4 SIP CPL Servers . . . . .	4-26
4.5.4.1 Indigo CPL Server . . . . .	4-26
4.6 Pingtel . . . . .	4-27
4.6.1 SIP Phones . . . . .	4-27
4.6.1.1 Pingtel xpressa . . . . .	4-27

4.7	RADVISION . . . . .	4-30
4.7.1	SIP Software Development Tools . . . . .	4-30
4.7.1.1	RADVISION Universal SIP Toolkit . . . . .	4-30
4.7.1.2	RADVISION Express SIP Toolkit . . . . .	4-31
4.8	Siemens Information and Communication Networks . . . . .	4-32
4.8.1	SIP Phones . . . . .	4-32
4.8.1.1	optiPoint 100 advance . . . . .	4-32
4.9	Ubiquity . . . . .	4-34
4.9.1	SIP Clients . . . . .	4-34
4.9.1.1	Helmsman SIP Desktop Agent . . . . .	4-34
4.9.2	SIP Servers . . . . .	4-35
4.9.2.1	Helmsman SIP Network Server . . . . .	4-35
4.9.3	SIP PIM Software and SIP CPL Servers . . . . .	4-37
4.9.3.1	Helmsman Applications Services Broker . . . . .	4-37
4.9.4	SIP Software Development Tools . . . . .	4-38
4.9.4.1	Helmsman Design Deck . . . . .	4-38
Appendix A:	References . . . . .	A-1
	Telcordia Documents . . . . .	A-1
	ITU-T Documents . . . . .	A-3
	IETF Documents . . . . .	A-3
	ATM Forum Documents . . . . .	A-4
	Websites Providing SIP Product Information . . . . .	A-4
Appendix B:	Glossary . . . . .	B-1
	Definition of Terms . . . . .	B-1
	Acronyms . . . . .	B-6

## List of Figures

Figure 1-1	SIP Phones Attached to Packet-Based Network . . . . .	1-4
Figure 1-2	Typical BICC Architecture for ITU-T BICC Capability Set 1 (CS-1) . . . . .	1-12
Figure 1-3	Capabilities within BICC CS-2 . . . . .	1-13
Figure 1-4	Anticipated Key Aspects of BICC CS-3 . . . . .	1-14
Figure 1-5	Typical Arrangement for SIP - Telephony . . . . .	1-15
Figure 1-6	Use of SIP Between PSTN Access CCA and Local Exchange CCA .	1-16
Figure 1-7	SIP Signaling without a Proxy Server . . . . .	1-17
Figure 2-1	SIP Architectural Overview . . . . .	2-2
Figure 2-2	Registration Attempt By User . . . . .	2-2
Figure 2-3	Successful Registration Attempt . . . . .	2-3
Figure 2-4	SIP Terminal Initiating a Session/Call (Using Invite Message) . . .	2-4
Figure 2-5	SIP Redirect Server Indicating Called User Has Moved . . . . .	2-4
Figure 2-6	Calling Terminal Initiating Call Directly to User B . . . . .	2-5
Figure 2-7	Called User Alerting (Direct Call) . . . . .	2-6
Figure 2-8	Called User Answer (Direct Call) . . . . .	2-7
Figure 2-9	Confirmation of Called User Answer (Direct) . . . . .	2-8
Figure 2-10	Call Disconnect (Direct Call) . . . . .	2-8
Figure 2-11	Confirmation of Call Disconnect (Direct Call) . . . . .	2-9
Figure 2-12	Session Initiation via a SIP Proxy Server . . . . .	2-10
Figure 2-13	SIP Proxy Server Responding to the Caller and Initiating New Call Leg . . . . .	2-10
Figure 2-14	Called User Alerting . . . . .	2-11
Figure 2-15	Called Party Answers the Call . . . . .	2-12
Figure 2-16	Acknowledgment of Called Party Answer . . . . .	2-12
Figure 2-17	Disconnect of a Call (via Proxy) . . . . .	2-13
Figure 2-18	Confirmation of Disconnect (via Proxy) . . . . .	2-13
Figure 3-1	SIP High Level Architecture . . . . .	3-1
Figure 3-2	SIP Proxy Server Architecture . . . . .	3-6

## List of Tables

Table 3-1	Information Response Messages (1xx Series) . . . . .	3-11
Table 3-2	Redirection Response Messages (3xx Series) . . . . .	3-12
Table 3-3	Request Failure Messages (4xx Series) . . . . .	3-12
Table 3-4	Server Internal Failure Messages (5xx Series) . . . . .	3-14
Table 3-5	Global Failure Messages (6xx Series) . . . . .	3-15
