INTRODUCTION TO RELIABILITY OF LASER DIODES AND MODULES

Contents

ABSTRACT 1–1

1. INTRODUCTION 1–1
   - 1.1 Typical Applications 1–2
   - 1.2 Application Environments 1–4
   - 1.3 Common Laser Diode Structures 1–5
   - 1.4 Common Laser Module Designs 1–11

2. DESIGN ISSUES AND FAILURE MODES 2–1
   - 2.1 Laser Diode 2–1
   - 2.2 Laser Module 2–7
   - 2.3 Component Parts 2–17
   - 2.4 Summary 2–21

3. SCREENING 3–1
   - 3.1 Laser Diode 3–2
   - 3.2 Laser Module 3–4
   - 3.3 Component Parts 3–4

4. QUALIFICATION PRACTICES 4–1
   - 4.1 Laser Diode Characterization 4–1
   - 4.2 Laser Module Characterization 4–17
   - 4.3 Mechanical Tests 4–20
   - 4.4 Laser Diode Endurance Tests 4–21
   - 4.5 Laser Module Endurance Tests 4–25
   - 4.6 Special Tests 4–28
   - 4.7 Other Module Components 4–29
   - 4.8 Requalification /Reliability Monitors 4–30

5. RELIABILITY PREDICTIONS 5–1
   - 5.1 Wear-Out Failures 5–1
   - 5.2 Random Failures 5–8
   - 5.3 Other Issues 5–10
   - 5.4 Reliability Prediction Summary 5–10

6. CONCLUDING REMARKS 6–1

7. GLOSSARY 7–1

8. REFERENCES AND RELATED INFORMATION 8–1
