

CONTENTS

1. Introduction	1
1.1 Background	1
1.2 The IN/1+ Architecture	1
1.3 Service Logic Interpreter Definition	3
1.3.1 Service Logic Representation	3
1.3.2 The SLI/1+ Environment	3
1.3.3 High-Level View of Service-Logic Processing	4
1.4 Document Status	5
2. User Perspective	6
2.1 Caller	6
2.2 Service Designer	6
2.2.1 Fixed Service Logic	6
2.2.2 Flexible Service Logic / Data	7
2.3 Other BOC Personnel	8
3. SLI/1+ Execution Environment	9
3.1 General Requirements	9
3.2 FC-Execution Model	9
3.3 Service Logic Programs	11
3.4 SLI/1+ System Services	12
3.4.1 Message Handling	12
3.4.2 Process Management	13
3.4.3 Memory Management	13
3.4.4 Data Management	13
3.4.5 Time Management	13
3.4.6 SLP Management	14
3.4.7 Exception Handling	14
3.5 SLP Selection	14
3.5.1 Conditions for SLP Initiation	14
3.5.2 Selecting an SLP	14
3.6 SLP Execution Model	15
3.6.1 The Multi-process Environment	15
3.6.2 Interprocess Communication and Synchronization	16
3.6.2.1 Message Passing	16
3.6.2.2 Semaphores	16
3.6.2.3 Event Flags	16
3.6.3 Incoming Message Flow	16
3.6.3.1 Call Processing Messages	16
3.6.3.2 Operations Messages	16
3.6.4 SLP Processing Flow	16
4. Specification Technique	17
4.1 Application Program Interface (API) Definitions	17
4.1.1 Specification Format	17
4.1.2 Parameter Types	18
4.2 Specifications of FC Routines	18
5. Network Action Routines	19

5.1	General Processing	19
5.1.1	SLI/1+ Communications with other Modules	19
5.1.1.1	Message-Oriented Model	20
5.1.1.2	FC-Routine Sequencing Control	20
5.1.2	Signal Management	21
5.1.3	Connection Control Model	21
5.1.3.1	Logical Illustration	21
5.1.3.2	CCM Parameter Block	22
5.2	Transfer of Control Routines	25
5.2.1	RELEASE	25
5.2.2	END	25
5.3	Connection Control Routines	26
5.3.1	CREATE_JOIN	26
5.3.2	CREATE_SEND/RECEIVE	27
5.3.3	CREATE_ON_ANSWER_JOIN	27
5.3.4	JOIN	28
5.3.5	SPLIT	29
5.3.6	FREE	29
5.4	Routines for Accessing Resources	30
5.4.1	LOCATE_RESOURCES	30
5.4.2	RELEASE_RESOURCES	31
5.4.3	ASSIST	31
5.5	Network Participant Interaction Routines	31
5.5.1	SEND/RECEIVE	32
5.6	Network Information Management Routines	32
5.6.1	RETRIEVE	32
5.6.2	UPDATE	33
5.7	Information Collection Routines	33
5.7.1	START_COLLECTION	33
5.8	Processing Routines	34
5.8.1	MONITOR	34
5.8.2	CONTINUOUS_MONITOR	35
5.8.3	CANCEL	35
5.8.4	POLL_RESOURCE_STATUS	36
5.8.5	GENERATE	36
5.9	Message Processing Routines	36
5.9.1	CHECK_RESPONSE	36
5.9.2	RETRIEVE_RESPONSE	37
5.10	Routines for Invoking Switch Logic	37
5.10.1	ACTIVATE	37
6.	Internal SLI/1+ Routines	38
6.1	Data Management Routines	38
6.2	Data Transfer Routines	38
6.3	Memory Management Routines	38
6.4	Time Management Routines	38
6.5	Process Management Routines	38
6.5.1	GET_PROCESS_INFO	38
6.6	Process Synchronization and Communication Routines	39
6.7	Exception Handling Routines	39

TA-TSY-000924
Issue 1, September 1988
SLI/1+ Framework TA

6.8 Flexible Logic Routines	39
7. Operations and Administration	40
7.1 Operations Logic Programs (OLPs)	40
7.2 Operations Domains	41
7.3 Memory Administration	41
7.3.1 Generalized NEMA Functions and Features	41
7.3.2 SLI/1+ Memory Administration Functions and Features	42
7.4 Surveillance and Maintenance	43
7.5 Testing	43
7.6 Network Traffic Management	43
7.7 Network Data Collection	43
8. Performance	45
9. Glossary	46
10. Acronyms	51
REFERENCES	54
APPENDIX A Specifications of FC Routines	A-1
APPENDIX B IN/1+ Impacts on the SCP Node Generic Requirements	B-1
APPENDIX C SLI/1+ — SLP Interface Information	C-1
APPENDIX D TCAP Procedures	D-1
