## OSSGR Sections 11-20: Miscellaneous

### Contents

Preface .....	Preface-1
11. Service Standards .....	11-1
11.1 General .....	11-1
11.1.1 Basis for Provisioning of Engineered Facilities .....	11-1
11.1.2 Average Busy Season Busy-Hour Load .....	11-2
11.1.3 Ten High Day and High Day Busy Hour Loads .....	11-2
11.1.3.1 Twenty-First High Half-Hour .....	11-2
11.2 Dial-Tone Delay .....	11-2
11.3 Network Service .....	11-2
11.4 Service Circuits .....	11-3
11.5 Incorrect Treatment .....	11-3
11.6 Post-Dialing Delay .....	11-3
11.7 Answer Supervision Delay .....	11-3
11.8 Cutoff Calls .....	11-3
11.9 Ineffective Attempts .....	11-3
11.10 System Performance .....	11-3
11.10.1 Reference Loads .....	11-4
11.10.2 Criteria at Normal Operating Conditions .....	11-4
11.10.2.1 Blocking Criteria .....	11-5
11.10.2.2 Delay Criteria .....	11-5
11.10.2.3 Response Times for Screen Displays .....	11-7
11.10.2.4 Response Time for Announcements .....	11-9
11.10.2.5 Response Time for Detection .....	11-10
11.10.3 Criteria Under Overload Conditions .....	11-11
11.10.3.1 Blocking Criteria .....	11-12
11.10.3.2 Delay Criteria .....	11-12
11.10.4 Call-Processing Irregularities .....	11-13
11.10.4.1 Premature Release .....	11-13
11.10.4.2 Incorrect Charging or Accounting .....	11-13
11.10.4.3 Misrouting .....	11-14
11.10.4.4 Other Failures .....	11-14
12. Reliability and Quality (R&Q) .....	12-1
12.1 Introduction .....	12-1
12.2 System Reliability Objectives .....	12-2
12.2.1 Overview .....	12-2
12.2.2 Cutoff Calls .....	12-3
12.2.3 Ineffective Machine Attempts .....	12-3

---

12.2.4	Failure Rates .....	12–3
12.2.5	Downtime.....	12–3
12.2.5.1	Core System.....	12–3
12.2.5.2	Other Subsystems .....	12–4
12.3	Component Reliability .....	12–4
12.4	Physical Design .....	12–4
12.5	Manufacturing .....	12–5
12.5.1	Management Commitment and Organization .....	12–5
12.5.2	Documentation .....	12–5
12.5.3	Control of Design Changes .....	12–5
12.5.4	Control of Procured Material .....	12–5
12.5.5	Manufacturing Processes .....	12–6
12.5.6	In-Process Testing and Inspection .....	12–6
12.5.7	Completed Item Testing and Inspection .....	12–6
12.5.8	Equipment Calibration and Maintenance.....	12–6
12.5.9	Control of Nonconforming Material .....	12–6
12.5.10	Storage, Handling, and Packaging .....	12–7
12.5.11	Corrective Action Program .....	12–7
12.5.12	Product Identification.....	12–7
12.5.13	Initial Product Qualification and Periodic Requalification.....	12–7
12.5.14	Quality Information.....	12–7
12.5.15	Collection and Analysis of Field Performance Data.....	12–7
12.5.16	Quality Improvement Program .....	12–7
12.6	Software .....	12–8
12.6.1	Design and Architecture Requirements .....	12–8
12.6.1.1	Software Design and Architecture.....	12–8
12.6.1.2	Software R&Q Performance Measurements Requirements ...	12–8
12.6.2	Software Life Cycle Requirements .....	12–9
12.6.3	Acceptance, Qualification, and Test Requirements .....	12–10
12.6.3.1	General Software R&Q Acceptance Criteria.....	12–10
12.6.3.2	Criteria for Transition from System Test to First Application	12–11
12.6.3.3	Criteria for Transition from First Application to General	12–11
12.6.3.4	Criteria for Problem Reporting and Corrective Action .	12–11
12.6.4	Supplier Software Monitoring, Surveillance, and Inspection Program ...	12–12
12.7	Product Support.....	12–12
12.7.1	Reliability and Quality Cost.....	12–12
12.7.2	Engineering and Ordering .....	12–12
12.7.3	Installation.....	12–13
12.7.4	First Application .....	12–13
12.7.5	Training.....	12–13

---

12.7.6	Technical Assistance.....	12-13
12.7.7	Deliverable Customer Documentation.....	12-13
12.7.8	Product Change Procedures.....	12-13
12.7.9	Repair.....	12-14
12.7.10	Spares Plan.....	12-14
12.7.11	In-Service Performance Monitoring.....	12-14
12.7.12	Engineering Complaints.....	12-14
13.	Power and Grounding.....	13-1
14.	Equipment.....	14-1
15.	Electromagnetic and Electrical Environment.....	15-1
16.	Network Management.....	16-1
16.1	General.....	16-1
16.2	Automatic NM Controls.....	16-2
16.3	Manual NM Controls.....	16-2
16.4	Automatic LIDB NM Controls.....	16-2
16.4.1	Core System Functions for ACG.....	16-3
16.4.1.1	Receipt and Interpretation of the ACG at Operator Services System.....	16-3
16.4.1.2	Control Initiation at Operator Services System.....	16-5
16.4.1.3	Control Activation at Operator Services System.....	16-6
16.4.1.4	Control Deactivation at Operator Services System.....	16-6
17.	System Capacity.....	17-1
17.1	General.....	17-1
17.1.1	Disclosure.....	17-1
17.1.2	Justification.....	17-1
17.1.3	Verification.....	17-2
17.1.4	Monitoring Ability.....	17-2
17.1.5	Documentation.....	17-2
17.2	Major Capacity Limits.....	17-2
17.2.1	Positions.....	17-2
17.2.2	Call Capacity.....	17-3
17.2.3	Trunks.....	17-4
17.2.4	Remote Operator System (ROS) Capacity Limits.....	17-4
17.3	Other Capacity Limits.....	17-4
17.4	Subsystem Capacity Limits.....	17-4
18.	Synchronization.....	18-1
19.	Documentation.....	19-1
19.1	General.....	19-1
19.2	Required Documentation.....	19-1
19.3	Documentation Standards.....	19-2

---

20. Future Development.....20–1  
References ..... References–1  
Glossary.....Glossary–1

## List of Figures

Figure 12-1. Simplified Model of a Hypothetical Core System..... 12-2

## List of Tables

Table 16-1. ACG Control Interval .....	16–4
Table 16-2. ACG Control Duration .....	16–5
