

CONTENTS

1. Introduction	1-1
1.1 Purpose	1-4
1.2 Document Organization	1-4
1.3 Key Bellcore Documents	1-5
1.4 Conventions	1-5
1.5 Scope of Generic Criteria on SS NEs	1-6
2. SMDS Overview	2-1
2.1 Service Description	2-1
2.2 Service Features	2-1
2.2.1 Access	2-1
2.2.2 Addressing	2-2
2.3 SMDS Interface Protocol	2-2
2.3.1 SIP Level 3_Protocol Data Unit Format	2-2
2.3.2 SIP Level 2_Protocol Data Unit Format	2-5
2.4 Quality of Service Objectives	2-6
3. SMDS Operations Technology	3-1
3.1 Approach	3-1
3.2 Operations Architecture	3-2
3.2.1 Network	3-2
3.2.1.1 Console	3-2
3.2.1.2 Supervisory System	3-2
3.2.2 Operations Systems	3-2
3.3 Operations Communications Architecture	3-3
4. SMDS Memory Administration Network Element Generic Requirements	4-1
4.1 Purpose	4-1
4.1.1 Supervisory Systems and Gateway SS NEs	4-1
4.1.2 Structure of Section 4	4-2
4.2 Changes Since Supplement 2 to TA-TSV-000774, Issue 3	4-2
4.3 Provisioning-Driven Functions	4-4
4.3.1 Information Validation	4-4
4.3.2 Memory Update	4-4
4.3.2.1 Immediate Updates	4-5
4.3.2.2 External Update Support	4-5
4.3.2.3 Control Program Updates	4-7
4.3.3 Database Query	4-7
4.3.4 Report Completions and Failures	4-7
4.4 System Administration Functions	4-8
4.4.1 Memory Backup and Restoration	4-8
4.4.2 Database Security	4-11
4.5 SMDS Object Classes	4-14
4.5.1 SMDS-Specific Object Classes	4-14
4.5.1.1 Subscriber Access	4-15
4.5.1.2 Individual Address Screening Table	4-17
4.5.1.3 Group Address Screening Table	4-24
4.5.1.4 Maximum Concurrent Data Units	4-27
4.5.1.5 Group Address Table	4-28

4.5.1.6	Access Class Table . . . . .	4-30
4.5.1.7	SS Trunks . . . . .	4-31
4.5.1.8	Routing Selection Table . . . . .	4-32
4.5.2	Generic Memory Administration Functional Object Classes to Support SMDS . . . . .	4-32
4.5.2.1	Database Change Report . . . . .	4-32
4.5.2.2	Database Capture Buffer . . . . .	4-33
4.5.2.3	Backup Schedule . . . . .	4-33
4.5.2.4	Mediation Device . . . . .	4-34
4.5.2.5	Event Forwarding Discriminator . . . . .	4-34
4.5.2.6	Equipment Holder . . . . .	4-34
4.5.2.7	Circuit Pack . . . . .	4-35
4.5.2.8	Equipment . . . . .	4-35
4.5.2.9	Network Element . . . . .	4-35
4.5.3	Security Administration Object Classes . . . . .	4-36
4.5.3.1	User-Related Security . . . . .	4-36
4.5.3.2	Calling Address Security . . . . .	4-37
4.5.3.3	Calling Address Privileges . . . . .	4-38
4.5.3.4	Service-Related Security . . . . .	4-38
4.5.3.5	Object Class Access Security . . . . .	4-38
4.5.3.6	Instance and Attribute Security . . . . .	4-39
5.	SMDS Maintenance Network Element Generic Requirements . . . . .	5-1
5.1	Introduction . . . . .	5-1
5.1.1	Maintenance Goals and Methods . . . . .	5-1
5.1.2	Structure of the Network from a Maintenance Perspective . . . . .	5-1
5.1.2.1	Subscriber Access . . . . .	5-2
5.1.2.2	Other Structural Factors Relevant to Maintenance . . . . .	5-2
5.2	Changes Since Supplement 2 to TA-TSV-000774, Issue 3 . . . . .	5-3
5.3	Alarm Monitoring . . . . .	5-5
5.3.1	Failure Conditions for the Incoming and Outgoing Signals . . . . .	5-5
5.3.2	Alarm Conditions for the Internal Integrity of the SS . . . . .	5-6
5.3.3	Monitoring the Ability to Communicate with Subtending SS NEs . . . . .	5-8
5.3.4	Failure Condition Clears and Queries . . . . .	5-8
5.3.5	Alarm Severity . . . . .	5-8
5.4	Common Monitoring Requirements at Levels 1, 2, and 3 . . . . .	5-9
5.5	Physical Layer Performance Monitoring for the Incoming and Outgoing Signals . . . . .	5-10
5.6	Protocol Performance Monitoring — Levels 2 and 3 . . . . .	5-11
5.6.1	Protocol Parameters Monitored by Network Elements . . . . .	5-12
5.6.1.1	Level 3 Parameters . . . . .	5-15
5.6.1.2	Level 2 Parameters . . . . .	5-18
5.6.2	Performance Monitoring Algorithms . . . . .	5-20
5.6.2.1	Sum-of-Errors Algorithm . . . . .	5-20
5.6.2.2	Bursty Error Algorithm . . . . .	5-21
5.6.3	Protocol Monitoring Plan . . . . .	5-22
5.6.3.1	Level 3 Protocol Monitoring . . . . .	5-23
5.6.3.2	Level 2 Protocol Monitoring . . . . .	5-25
5.7	Testing . . . . .	5-26
5.7.1	Testing of Physical Level of Subscriber Access . . . . .	5-26
5.7.2	Line Loopbacks . . . . .	5-26

5.7.3	Diagnostics . . . . .	5-26
5.7.4	Protocol Test Access — Protocol Analysis . . . . .	5-27
5.7.5	Testing of SIP Level 3 . . . . .	5-27
5.7.5.1	General Description . . . . .	5-27
5.7.5.2	Loopback Test to a Well-Known SMDS Address: LLC-based Loopback Test Requirements . . . . .	5-27
6.	SMDS Network Traffic Management Network Element Generic Requirements . . . . .	6-1
6.1	Purpose and Goals . . . . .	6-1
6.2	Changes Since Supplement 2 to TA-TSV-000774, Issue 3 . . . . .	6-1
6.3	Definition of Congestion . . . . .	6-2
6.3.1	Time Signatures of Congestion . . . . .	6-2
6.4	Reference Architecture . . . . .	6-4
6.4.1	Congestable Resources . . . . .	6-5
6.4.1.1	Congestion in an SNI Access Interface . . . . .	6-6
6.4.1.2	Congestion in a Intra-SS Access Interface . . . . .	6-6
6.4.1.3	Congestion at the Common Resources . . . . .	6-6
6.4.1.4	SS NE Wide Congestion . . . . .	6-6
6.4.1.5	SS Wide Congestion . . . . .	6-6
6.5	Congestion Measurements . . . . .	6-6
6.5.1	Collecting and Reporting NTM Congestion Measurements . . . . .	6-8
6.5.2	Thresholding Strategy . . . . .	6-11
6.5.2.1	Onset Thresholds . . . . .	6-12
6.5.2.2	Abatement Thresholds . . . . .	6-13
6.5.2.3	Thresholding Algorithm . . . . .	6-13
6.6	NTM Controls . . . . .	6-14
6.6.1	Automatic Controls . . . . .	6-14
6.6.2	Manual Controls . . . . .	6-14
7.	SMDS Network Data Collection Network Element Generic Requirements . . . . .	7-1
7.1	Purpose . . . . .	7-1
7.2	Overview . . . . .	7-1
7.3	Changes Since Supplement 2 to TA-TSV-000774, Issue 3 . . . . .	7-1
7.4	Data Collection Requirements . . . . .	7-2
7.4.1	Data Collection Principles . . . . .	7-2
7.4.2	Data Priority . . . . .	7-2
7.5	Managing Collection and Reporting of Measurements . . . . .	7-2
7.5.1	Data Collection and Reporting . . . . .	7-3
7.5.2	Specifying Measurements to be Collected . . . . .	7-4
7.5.2.1	Scheduled Measurements . . . . .	7-4
7.5.2.2	Special Studies . . . . .	7-4
7.5.3	Specifying Reporting Schedules . . . . .	7-4
7.6	Network Usage Measurements . . . . .	7-5
7.7	Scheduled Measurements . . . . .	7-5
7.7.1	SS NE Scheduled Measurements . . . . .	7-5
7.7.1.1	Intra-SS Trunks Measurements . . . . .	7-5
7.7.1.2	Congestion Measurements . . . . .	7-6
7.7.1.3	Undelivered L3_PDU's . . . . .	7-6
7.7.1.4	L3_PDU's with Unrecognized Destination Addresses . . . . .	7-7
7.7.2	Subscriber Access Scheduled Measurements . . . . .	7-7
7.7.2.1	Traffic Load Measurements . . . . .	7-7

7.7.2.2	Group Addressing Measurements . . . . .	7-8
7.7.2.3	Counts of L3_PDU's Showing Disagreements . . . . .	7-8
7.8	Special Studies . . . . .	7-11
7.8.1	Traffic Characterization Studies . . . . .	7-11
7.8.2	Characterization of L3_PDU Lengths . . . . .	7-12
8.	Order of Precedence for Processing of SMDS Protocol Data Units . . . . .	8-1
8.1	Overview . . . . .	8-1
8.2	Changes Since Supplement 2 to TA-TSV-000774, Issue 3 . . . . .	8-2
8.3	Order of Precedence for PDUs at Ingress . . . . .	8-3
8.3.1	Order of Precedence for BOM Segments at Ingress . . . . .	8-3
8.3.2	Order of Precedence for COM Segments at Ingress . . . . .	8-5
8.3.3	Order of Precedence for EOM Segments at Ingress . . . . .	8-5
8.3.4	Order of Precedence for SSM Segments at Ingress . . . . .	8-6
8.4	Order of Precedence for PDUs at Egress . . . . .	8-8
9.	Customer Network Management . . . . .	9-1
10.	Operations Interface Requirements . . . . .	10-1
10.1	User System Interface . . . . .	10-1
10.2	OS/NE Interface . . . . .	10-1
11.	Documentation Requirements . . . . .	11-1
12.	Glossary . . . . .	12-1
13.	Acronyms . . . . .	13-1
Appendix A.	Maintenance Performance Monitoring Calculations . . . . .	A-1
A.1	Width of Counters . . . . .	A-1
A.2	Threshold Value Ranges . . . . .	A-2
A.3	Accuracy of 15 Minute Period . . . . .	A-2
Appendix B.	Monitored Parameters Used in the Assessment of L3_PDU Discards . . . . .	B-1
REFERENCES	. . . . .	R-1
